

2023 Regional Flood Plan Appendices

Region 11 / Guadalupe

DRAFT August 2022

List of Appendices

- 1-A List of Previous Studies Considered for Development of the Regional Flood Plan
- 1-A **Map 1:** Existing Flood Infrastructure
- 1-A **Table 1:** Existing flood infrastructure summary table
- 1-A **Map 3:** Non-Functional or Deficient Flood Mitigation Features or Infrastructure
- 1-B **Map 2:** Proposed or Ongoing Flood Mitigation Projects
- 1-B **Table 2:** Summary of proposed or ongoing flood mitigation projects
- 2-A **Map 4:** Existing Condition Flood Hazard
- 2-A **Table 3:** Existing condition flood risk summary table (by county)
- 2-A **Map 5:** Existing Condition Flood Hazard - Gaps in Inundation Boundary Mapping including Identification of Known Flood-Prone Areas
- 2-A **Map 6:** Existing Condition Flood Exposure
- 2-A **Map 7:** Existing Condition Flood Vulnerability including Critical Infrastructure
- 2-B **Map 8:** Future Condition Flood Hazard
- 2-B **Table 5:** Future condition flood risk summary table, by county
- 2-B **Map 9:** Future Condition Flood Hazard - Gaps in Inundation Boundary Mapping including Identification of Known Flood-Prone Areas
- 2-B **Map 10:** Extent of Increase of Flood Hazard Compared to Existing Condition
- 2-B **Map 11:** Future Condition Flood Exposure
- 2-B **Map 12:** Future Condition Flood Vulnerability including Critical Infrastructure
- 2-C List of Existing Hydrologic and Hydraulic Models
- 2-C **Map 22:** Model Coverage

- 3-A **Map 13:** Floodplain Management
- 3-A **Table 6:** Existing floodplain management practices
- 3-B **Table 11:** Regional flood plan flood mitigation and floodplain management goals
- 4-A **Map 14:** Greatest Gaps in Flood Risk Information
- 4-A **Map 15:** Greatest Flood Risk
- 4-B **Map 16:** Extent of Potential Flood Management Evaluations and Existing Mapping Needs
- 4-B **Map 17:** Extent of Potential Flood Mitigation Projects
- 4-B **Map 18:** Extent of Potential Flood Management Strategies
- 4-B **Table 12:** Potential flood management evaluations identified by RFPG
- 4-B **Table 13:** Potentially feasible flood mitigation projects identified by RFPG
- 4-B **Table 14:** Potentially feasible flood management strategies identified by RFPG
- 5-A **Map 19:** Recommended Flood Management Evaluations
- 5-A **Map 20:** Recommended Flood Mitigation Projects
- 5-A **Map 21:** Recommended Flood Management Strategies
- 5-A **Table 15:** Flood management evaluations recommended by RFPG
- 5-A **Table 16:** Potentially feasible flood mitigation projects recommended by RFPG
- 5-A **Table 17:** Potentially feasible flood management strategies recommended by RFPG
- 5-B FME, FMS, FMP One Pagers
- 9-A **Table 19:** FME, FMS, FMP Funding Survey
- 10-A Summary Memorandum of Pre-Planning Meeting, August 4, 2021
- 10-B Guadalupe RFPG Stakeholder Survey Form

- 10-C Public Comments
- 10-D Notice and Documentation of September 7, 2022 Public Hearing on Draft Flood Plan
- 10-E Public Comments from September 7, 2022 Public Hearing on Draft Flood Plan
- 10-F Responses to Public Comments from September 7, 2022 Public Hearing on Draft Flood Plan
- 10-G State Agency Comments on Draft Flood Plan
- 10-H Response to Stage Agency Comments on Draft Flood Plan
- 10-I Public Involvement Plan

Key
Floodplain management practices: None (no floodplain management practices in place), low (regulations meet the minimum NFIP standards), moderate (some higher standards, such as freeboard, detention requirements, or fill restrictions), strong (e.g., significant regulations that exceed NFIP standard with enforcement, or community belongs to the Community Rating System).
Level of enforcement: None (does not enforce floodplain management regulations), low (provides permitting of development in the floodplain, may not perform inspections, may not issue fines or violations), moderate (enforces much of the ordinance, performs limited inspections and is limited in issuance of fines and violations), high (actively enforces the entire ordinance, performs many inspections throughout construction process, issues fines, violations, and Section 1316s where appropriate, and enforces substantial damage and substantial improvement).

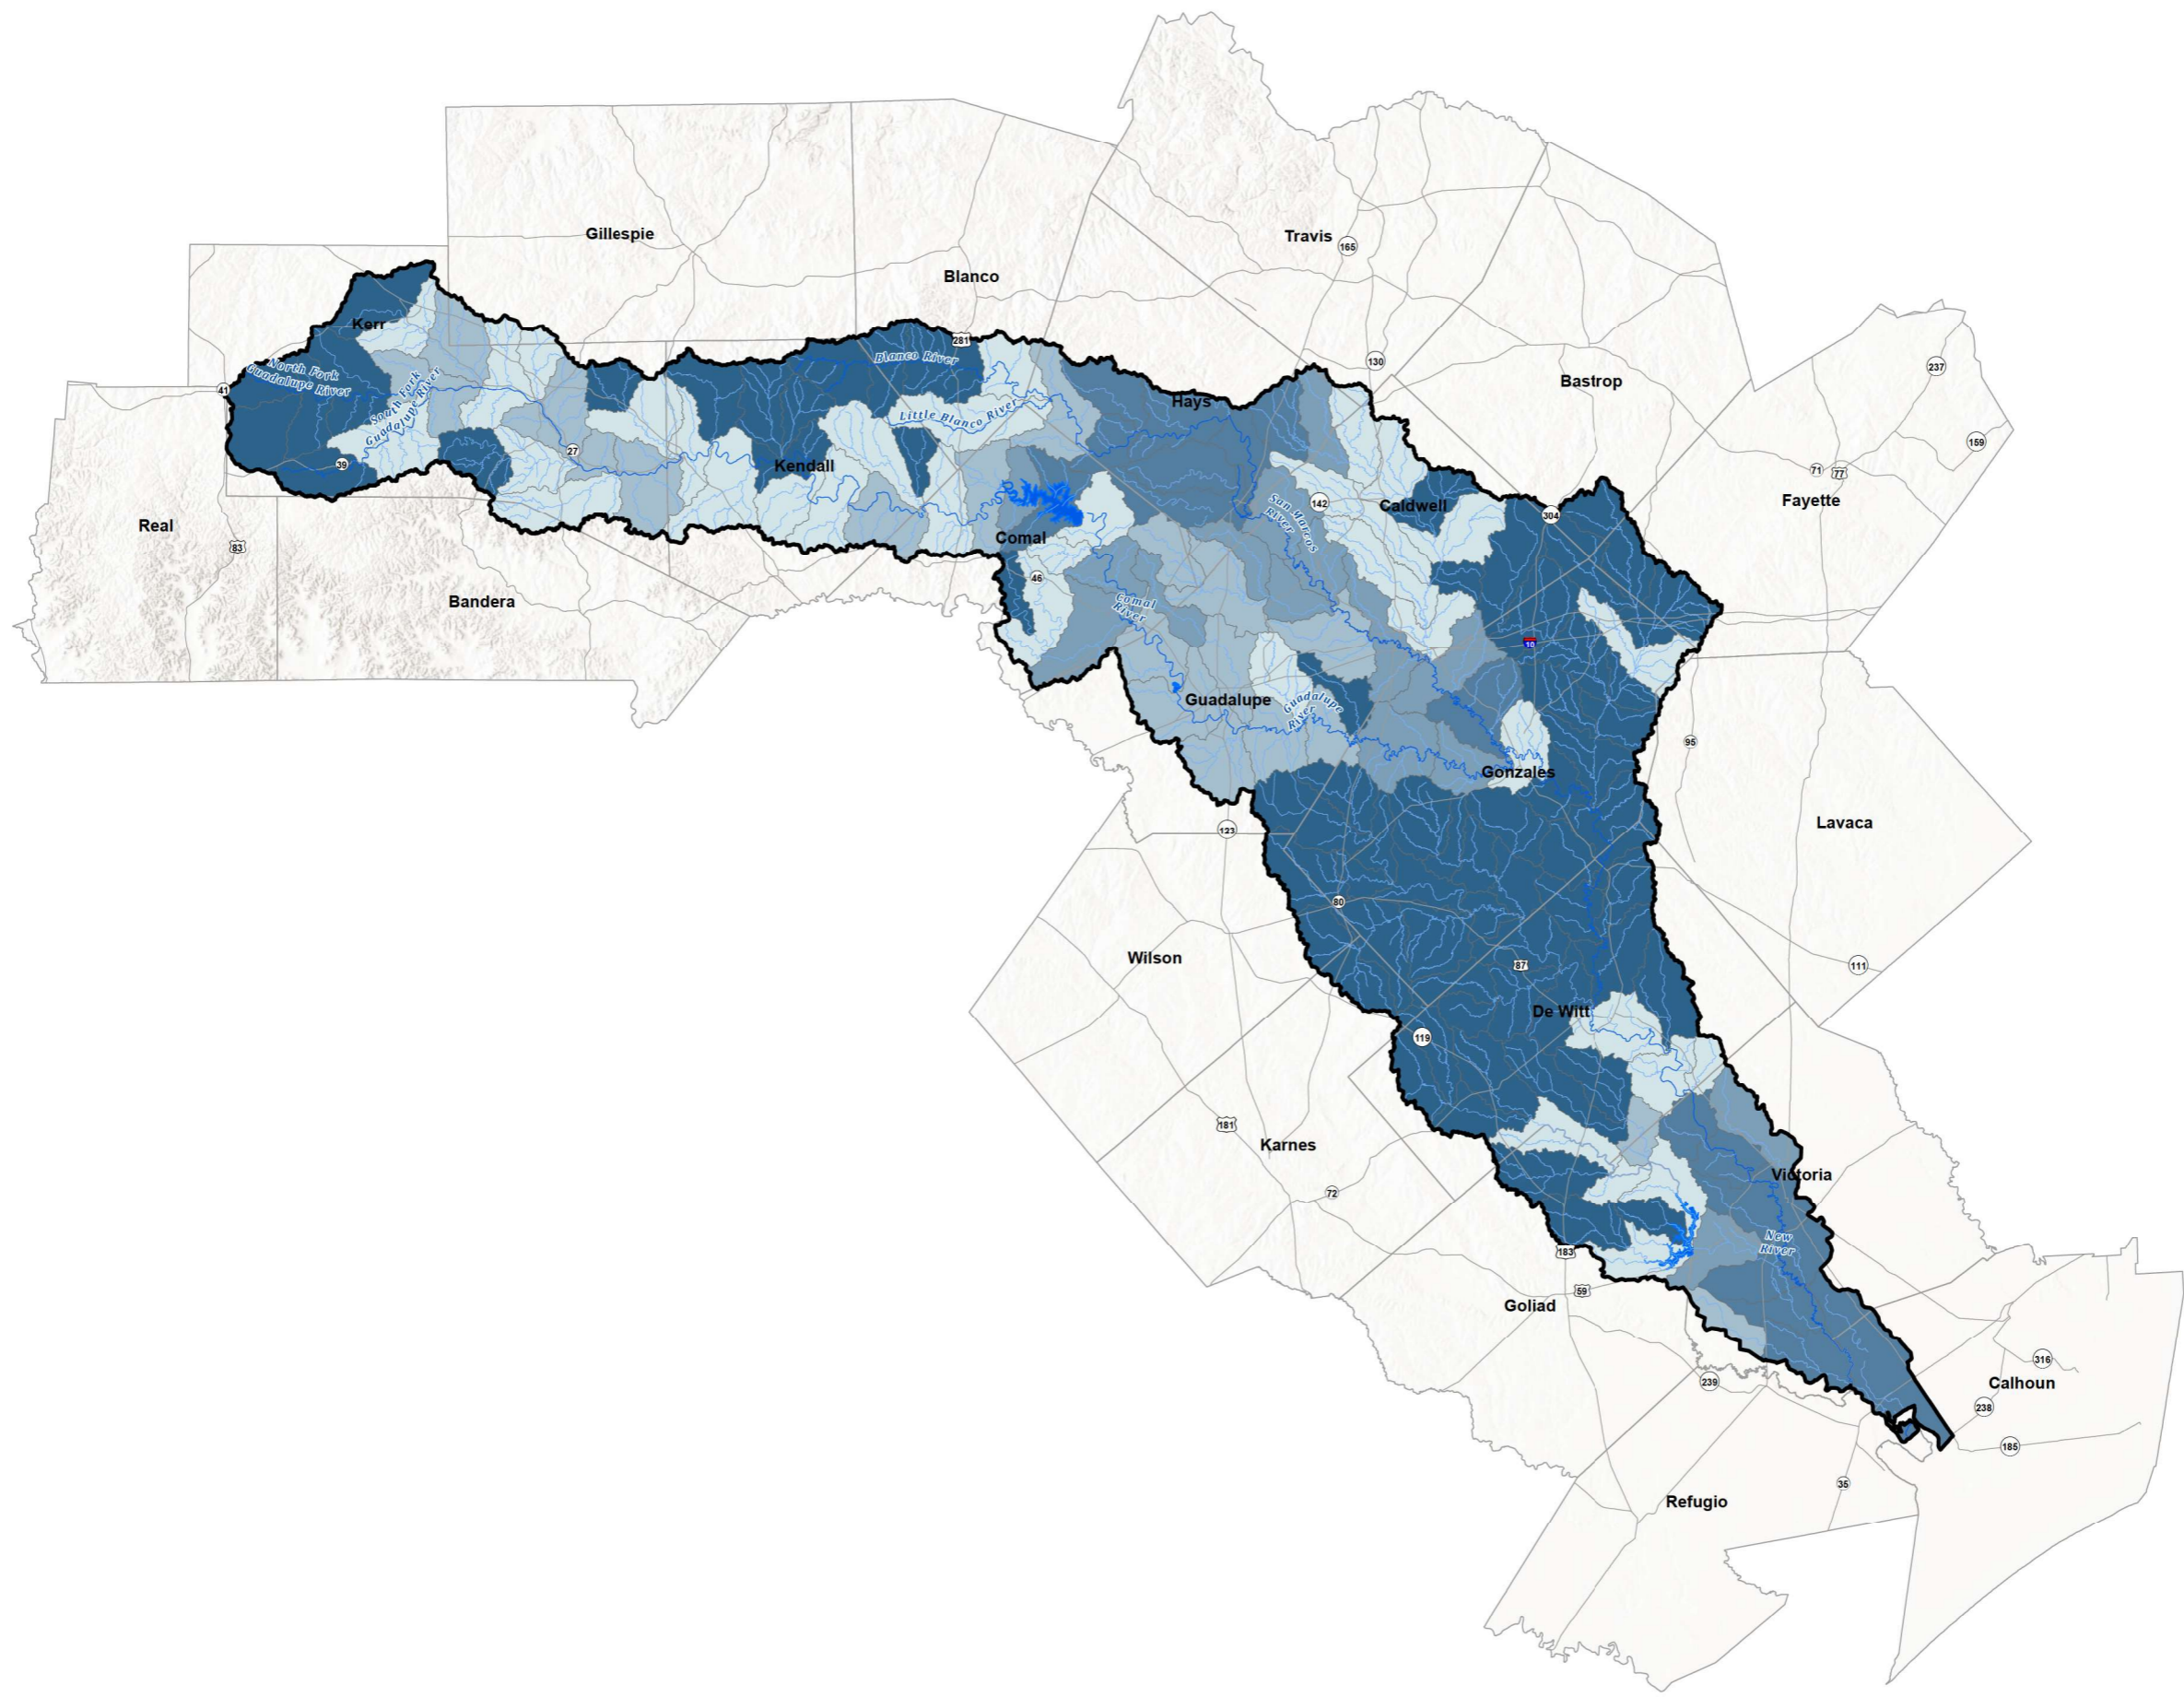

Appendix 3-B |

Table 11: Regional Flood Plan Flood Mitigation and Floodplain Management Goals

Goal ID	RFPG No.	RFPG Name	Goal	Term of Goal	Target Year	Applicable To	Overarching Goal	Associated Goal IDs
11000001	11	Guadalupe	Improve safety beyond minimal signage at 35% of low water crossings through automatic flood warning gates and/or flood level passed	Short Term (10-year)	2033	Flood planning region	Protect against loss of life and property (362.3.b.13-14)	11000002
11000002	11	Guadalupe	Improve safety beyond minimal signage at 90% of low water crossings through automatic flood warning gates and/or flood level passed	Long Term (30-year)	2053	Flood planning region	Protect against loss of life and property (362.3.b.13-14)	11000001
11000003	11	Guadalupe	Consider incorporating nature-based practices when acreage exceeds one acre (LID, green infrastructure, natural channel design) in 30% of Flood Mitigation Projects and Flood Management Strategies recommended in the Regional Flood Plan.	Short Term (10-year)	2033	Flood planning region	Include strategies and projects that use nature-based features (362.3.b.17)	11000004
11000004	11	Guadalupe	Consider incorporating nature-based practices when acreage exceeds one acre (LID, green infrastructure, natural channel design) in 100% of Flood Mitigation Projects and Flood Management Strategies recommended in the Regional Flood Plan.	Long Term (30-year)	2053	Flood planning region	Include strategies and projects that use nature-based features (362.3.b.17)	11000003
11000005	11	Guadalupe	Increase adoption of higher standards to 30% of communities in high growth counties.	Short Term (10-year)	2033	Flood planning region	Protect against loss of life and property (362.3.b.13-14)	11000006
11000006	11	Guadalupe	Increase adoption of higher standards to 70% of communities in high growth counties.	Long Term (30-year)	2053	Flood planning region	Protect against loss of life and property (362.3.b.13-14)	11000005
11000007	11	Guadalupe	Increase high growth community CRS participation to 50% of all high growth communities.	Short Term (10-year)	2033	Flood planning region	Protect against loss of life and property (362.3.b.13-14)	11000008
11000008	11	Guadalupe	Increase high growth community CRS participation to 75% of all high growth communities.	Long Term (30-year)	2053	Flood planning region	Protect against loss of life and property (362.3.b.13-14)	11000007
11000009	11	Guadalupe	Reduce number of vulnerable buildings/structures/critical facilities within the 1% existing flood hazard layer by 20%.	Short Term (10-year)	2033	Flood planning region	Protect against loss of life and property (362.3.b.13-14)	11000010
11000010	11	Guadalupe	Reduce number of vulnerable buildings/structures/critical facilities within the 1% existing flood hazard layer by 50%.	Long Term (30-year)	2053	Flood planning region	Protect against loss of life and property (362.3.b.13-14)	11000009
11000011	11	Guadalupe	Increase percentage of communities with dedicated funding sources for operations & maintenance and implementation of storm drainage systems to 35% of communities.	Short Term (10-year)	2033	Flood planning region	Protect against loss of life and property (362.3.b.13-14)	11000012
11000012	11	Guadalupe	Increase percentage of communities with dedicated funding sources for operations & maintenance and implementation of storm drainage system to 60% of communities	Long Term (30-year)	2053	Flood planning region	Protect against loss of life and property (362.3.b.13-14)	11000011

111000127	Upper Guadalupe River Authority Evaluation of Water and Sediment Control Facilities	Study to evaluate the flood benefits and cost-effectiveness of UGRA's existing nine Kerr County facilities. Evaluation would include H&H modeling and financial data to determine flood risk reduction. Results could guide decisions on future facilities.	11000009, 11000010	Kerr	12100201	-	11000001, 11000007, 11000024, 11000018, 11000020, 11000015, 11000009, 11000021, 11000017, 11000014, 11000016, 11000022, 11000013, 11000008, 11000002, 11000006, 11000011, 11000019, 11000010, 11000005, 11000003, 11000012, 11000004	Watershed Planning	1103.0	Riverine	Upper Guadalupe River Authority	11003543, 11003544, 11002585, 11000662, 11003546, 00000290, 00000255, 00000307, 00000291, 00000015, 00000339, 00000011, 11003545, 11003542, 00001401, 11003486, 00000022, 00000297, 00000268, 00000030, 00000017	No	\$250,000	TBD	3,833	2,315	11,538	6	158	Unknown	124.1	28,070.5	Unknown	Unknown

Table 13: Potentially Feasible Flood Mitigation
Projects Identified by RFPG

FMP ID	FMP Name	Description	Associated Goals (ID)	Counties	HUC12s	Watershed Name	Project Type	Project Area (sqmi)	Flood Risk Type (Riverine, Coastal, Urban, Playa, Other)	Sponsor	Entities with Oversight	Emergency Need (Y/N)	Estimated Project Cost (\$)	Potential Funding Sources and Amount	Flood Risk									
															Area in 100yr (1% annual chance) Floodplain	Area in 500yr (0.2% annual chance) Floodplain	Estimated number of structures at 100Yr flood risk	Residential structures at 100-year flood risk	Estimated Population at 100-year flood risk	Critical facilities at 100-year flood risk (#)	Number of low water crossings at flood risk (#)	Estimated number of road closures (#)	Estimated length of roads at 100-year flood risk (Miles)	Estimated farm & ranch land at 100-year flood risk (acres)
11300001	Detention on the Blanco River	The proposed dam height of 102 ft. and dam length of 1,840 ft. will provide a maximum storage capacity of approximately 1128 ac-ft.	11000009, 11000010	Blanco, Hays	-	11000059	Dam	6.34	Riverine	Kyle	00000008, 00000264, 00000291, 11002395, 11003546	No	\$933,800	-	3.82	0.91	508	417	1070	0	10	Unknown	-	-
11300006	Plum Creek Tributary 3 Arbor Knot Dr. Improvement	A proposed culvert improvement has been developed to convey a 1% ACE event. The proposed culvert improvement is to add one additional 8ft x 4ft culvert totaling three culverts at this location, and raising the finished deck elevation by 0.5ft.	11000009, 11000010	Hays	-	11000098	Infrastructure	0.02	Riverine	Blanco	00000026, 00000258, 00000291, 11002704, 11003546	No	\$557,000	-	0.01	0.00	2	2	4	0	0	Unknown	<Null>	<Null>
11300007	Plum Creek Tributary 4 Sledge Rd. Improvement	The proposed culvert improvement resulted in eight (7ft x 4ft) box culverts, needed to clear the roadway and to alleviate additional backwater flooding.	11000015, 11000010	Hays	-	11000107, 11000108, 11000106	Infrastructure	0.04	Riverine	Kyle	00000010, 00000255, 00000291, 00000392, 11000589, 11003538, 11003546	No	\$1,149,000	-	0.03	0.00	0	0	0	0	0	Unknown	0.1	3.5
11300010	65ft Channel Modification and Additional Culvert	The channel modifications consists of 65-ft bottom width channel modifications with 4:1 side slopes spanning from the North I-35 frontage road down past Goforth Road to Kym Way.	11000009, 11000010	Hays	-	11000075, 11000079	Comprehensive	0.19	Riverine	Kyle	00000008, 00000264, 00000282, 00000291, 11002393, 11003546	No	\$589,000	-	0.12	0.03	39	34	269	0	1	Unknown	0.8	2.3
11300011	Plum Creek Detention Pond Upstream of IH35	This project consists of a detention pond between the railroad track and the South bound I-35 frontage road. Under this proposed alternative a 13-ft high dam wall would be placed on Plum Creek near Kyle Center Drive.	11000009, 11000010	Hays	-	11000130	Detention Pond	0.33	Riverine	Kyle	00000094, 00000264, 00000291, 00000588, 11003546	No	\$864,000	-	0.23	0.05	49	43	312	0	2	Unknown	1.1	8.3
11300013	Wood Road/Landa Street Drainage Improvement	The drainage improvement project captures runoff east of Walnut Avenue and detains it in a 12-acre detention pond with 144 acre-feet of storage capacity. The pond outfall structure discharges to an existing channel south of Wood Road.	11000009, 11000010	Comal	-	11000107, 11000101, 11000102, 11000103, 11000104, 11000105	Other	0.17	Riverine	New Braunfels	00000016, 00000026, 00000258, 00000291, 11000387, 00000392, 11001889, 11002343, 00002800, 11003163, 11003534, 11003538, 11003546	No	\$35,757,000	-	0.06	0.05	47	23	667	0	0	Unknown	0.7	-
11300015	Improve Flood Warning Systems	Project includes enhancing stream flow gage network by increasing number of gages throughout community by at least six gages.	11000015, 11000016	Hays	-	11000098	Preparedness	25.69	Riverine	Woodcreek	00000026, 00000258, 00000291, 11002704, 11003546	No	\$339,000	-	6.17	2.62	2278	1626	20149	14	12	Unknown	46.9	-
11300026	Purgatory Creek Channel Improvement	Purgatory Creek Channel Improvement Project Preliminary Engineering Report	11000009, 11000010	Hays	-	11000099	Channel	0.20	Riverine	Waelder	00000026, 00000258, 00000291, 11003546	No	\$22,391,000	-	0.15	0.04	73	53	433	0	1	Unknown	1.4	<Null>
11300027	Sherwood/Kingwood Drainage Improvements	Sherwood Drive and Kingwood Street Improvements Preliminary Engineering Report	11000009, 11000010	Hays	-	11000017, 11000016, 11000012, 11000013, 11000014	Infrastructure	0.03	Riverine	Waelder	00000022, 00000255, 00000297, 11002585, 11003544, 11003542, 11003545, 11003546	No	\$5,644,000	-	0.01	0.00	15	14	32	0	0	Unknown	0.2	<Null>
11300035	Guadalupe Street Automatic Flood Gates	Place automatic flood gates with vehicle detection on inside of flooded area to allow for egress.	1.1E+14	Guadalupe	-	11000058, 11000060, 11000059	Preparedness	0.26	Riverine	Woodcreek	00000008, 00000264, 00000291, 11003546	No	\$115,000	-	0.14	0.03	53	17	287	2	0	Unknown	2.2	-
11300036	Baldrige Creek Regional Detention Pond	Project includes constructing a regional detention pond on Baldrige Creek northwest of the City and would release runoff at a substantially lower flowrate, resulting in lower flood elevations on Baldrige Creek through the City of Waelder	11000009, 11000010	Gonzales	-	11000107, 11000101, 11000102, 11000103, 11000104	Comprehensive	0.97	Riverine	Woodcreek	00000016, 00000026, 00000258, 0000291, 11000387, 00000392, 11001889, 11002343, 00002800, 11003163, 11003534, 11003538, 11003546	No	\$2,075,000	-	0.55	0.10	-	-	-	-	5	Unknown	2.5	-
11300037	Baldrige Creek Channel and Culvert Improvement and Detention Pond	Project consists of upstream regional detention pond plus a 50 ft. bottom width channel modification with 3:1 side slopes downstream of SH 97 and the addition of two 10 X 10 box culverts under SH 97.	11000009, 11000010	Gonzales	-	11000103	Comprehensive	0.29	Riverine	Comal	00000026, 00000258, 00000291, 11000387, 11003163, 11003546	No	\$3,928,000	-	0.25	0.02	122	68	179	0	4	Unknown	2.2	6.7
11300039	Wilson Creek - Green Acres Dr. Improvement	A proposed updated culvert geometry consists of 11 box culverts (10ft-12ft) and a raised finished deck elevation (3ft rise).	11000009, 11000010	Hays	-	11000110, 11000111	Infrastructure	0.02	Riverine	Gonzales	00000026, 00000034, 00000258, 0000291, 00000307, 00000862, 00001323, 11002217, 00002700, 00002799, 00002800, 11003533, 11003546	No	\$1,246,000	-	0.01	0.00	2	2	5	0	1	Unknown	0.1	<Null>
11300040	Regional Detention South of Mountain Crest Drive	The alternative consists of a 20 ft. tall detention structure with a 175 ac-ft detention capacity. The outflow control would consist of culverts for low flow and an overflow weir for high flow.	11000009, 11000010	Hays	-	11000014	Detention Pond	0.10	Riverine	Wimberley	00000022, 00000255, 00000297, 11002585, 11003545, 11003546	No	\$946,000	-	0.06	0.01	28	26	60	0	0	Unknown	0.4	-
11300041	Improvements to Brookside Drive Culvert Crossing	The culvert opening will be increased to three 36" concrete pipes to match the culvert capacity just downstream at Brook Meadow Dr. and also involve some minimal regrading of the stream flowline.	11000009, 11000010	Hays	-	11000110	LWC upgrade	0.00	Riverine	San Marcos	00000026, 00000258, 00000291, 0002800, 11003533, 11003546	No	\$38,000	-	0.00	0.00	<Null>	<Null>	<Null>	<Null>	<Null>	Unknown	0.0	-
11300042	Brookmeadow Drive Drainage Improvements	The proposed alternative consists of a rip rap ditch along the south side of Brookmeadow Drive, under Overbrook Court and down to Hog Creek with capacity to contain the most frequent flows.	11000009, 11000010	Hays	-	11000110	Channel	0.00	Riverine	San Marcos	00000026, 00000258, 00000291, 0002800, 11003533, 11003546	No	\$65,000	-	0.00	0.00	7	7	14	0	0	Unknown	0.1	-
11300044	Regional Detention on Bear Creek	The proposed dam height of 85 ft. and dam length of 620 ft. will provide a maximum storage capacity of approximately 3,375 ac-ft.	11000009, 11000010	Comal	-	11000042	Detention Pond	6.74	Riverine	Seguin	00000014, 00000255, 00000291, 0002670, 11003546	No	\$6,973,000	-	2.16	1.21	456	344	2274	0	9	Unknown	10.3	253.9
11300047	Regional Detention on Peach Creek	A 29 ft. high dam with a length of 5780 ft. would provide approximately 41,774 ac-ft of storage. This site would be able to store a large volume of water and greatly reduce the peak from the Peach Creek watershed.	11000009, 11000010	Gonzales	-	11000099, 11000095, 11000096, 11000097, 11000098	Detention Pond	7.37	Riverine	Kerr	00000014, 00000026, 00000031, 0000255, 00000258, 00000291, 0000307, 11002432, 11003546	No	\$7,821,000	-	5.87	0.38	22	18	51	0	3	Unknown	1.8	2820.9
11300052	Kerr County Back-up Power Generators	Installing generators at critical facilities will help ensure physical safety for facility occupants and maintain electronic systems functionality during power outages. Portable generators will maintain additional systems functionality	11000015, 11000016	Kerr	-	11000059	Preparedness	23.58	Riverine	San Marcos	00000008, 00000264, 00000291, 11002395, 11003546	No	\$806,000	-	4.26	2.26	1522	1050	7519	4	20	Unknown	30.6	193.3
11300057	Spring Street Erosion at Outfall Project	Project to extend existing 54" storm drain, regrade and compact earthen channel to stabilize against erosion, and construct concrete baffled chute to convey flow down the steep channel embankment with a stilling basin to dissipate excess energy.	11000009, 11000010	Kerr	-	11000130, 11000147, 11000131	Storm Drain	0.00	Riverine	Kerrville	00000094, 00000264, 00000291, 0000314, 00000588, 00002428, 00003277, 11003546	No	\$800,000	-	0.00	0.00	-	-	-	-	<Null>	Unknown	0.0	<Null>
11300058	Clay Street Drainage and Kroc Center Detention Pond Spillway Improvements	Proposed project to reconfigure and reconstruct the existing Kroc Center outlet structure and Clay Street drainage improvements. No adverse impacts have been identified downstream.	11000009, 11000010	Kerr	-	11000131	Comprehensive	0.03	Riverine	Kerrville	00000094, 00000264, 00000291, 0000588, 00002428, 00003277, 11003546	No	\$9,561,000	-	-	-	-	-	-	-	<Null>	Unknown	<Null>	<Null>

11100031	City of Kerrville Harper Road to Town Creek (Fay Drive) Drainage Improvements Study	Study of solutions to implement drainage improvements on Harper Road to Town Creek (Fay Drive).	11000009, 11000010	Kerr	12100201	-	11000013, 11000012	0.2	Riverine	Kerrville	00000255, 00000297, 11003545, 11002585, 00000022, 11003546	No	\$150,000	Yes	Meets minimum TWDB requirements
11100033	City of Kyle Prairie and Woodland Restoration Plan	Prepare and implement a prairie or woodland restoration plan for 1 or more of Kyle's park properties. Selection of a municipal park where all or a portion of the site may be restored to a natural grassland or woodland	11000003, 11000004	Hays	12100203	-	11000102, 11000101, 11000116, 11000110, 11000100	31.2	Riverine	Kyle	00000026, 11003534, 00002703, 11003546, 00000307, 00000291, 11002282, 11003539, 00000392, 11003533, 11001438, 11000387, 11003163, 11002051, 00000258, 11003538, 00002800, 00002799, 11002217	No	\$250,000	Yes	Meets minimum TWDB requirements
11100034	City of Kyle - N. Burleson Street Drainage Improvements Project Planning	Project planning for proposed project to conduct street reconstruction and drainage improvements to minimize flooding in the downtown area.	11000009, 11000010	Hays	12100203	-	11000110	0.0	Riverine	Kyle	11003546, 00000026, 00002800, 00000291, 11003533, 00000258	No	\$983,000	Yes	Meets minimum TWDB requirements
11100035	City of Lockhart Drainage Improvements Study	Study to identify Capital Improvements to Municipal Drainage System and study solutions to upgrade system to improve drainage capacity and reduce flood damages.	11000009, 11000010	Caldwell	12100203	-	11000112, 11000114, 11000116, 11000113	15.6	Riverine	Lockhart	11003546, 11003538, 11003534, 11002343, 00000291, 11003541, 11003539, 11002333, 00000392, 11003533, 11003162, 00000016, 00000258	No	\$2,400,000	Yes	Meets minimum TWDB requirements
11100036	City of Lockhart USACE Study	Undertake a comprehensive study of flood risk and reduction alternatives with USACE, covering all incorporated and unincorporated areas of the city that currently have limited studies with no determined base flood elevations as well as unmapped areas.	11000009, 11000010	Caldwell	12100203	-	11000112, 11000114, 11000116, 11000113	15.6	Riverine	Lockhart	11003546, 11003538, 11003534, 11002343, 00000291, 11003541, 11003539, 11002333, 00000392, 11003533, 11003162, 00000016, 00000258	No	\$360,000	Yes	Meets minimum TWDB requirements
11100037	City of Luling Drainage Improvements Study	Study of solutions to upgrade undersized stormwater drains and culverts.	11000009, 11000010	Guadalupe, Caldwell	12100203	-	11000120, 11000119, 11000118, 11000121	5.5	Riverine	Luling	00000255, 11003546, 00000010, 00000291, 11003474, 11003533, 11003535, 00000016, 00000258	No	\$150,000	Yes	Meets minimum TWDB requirements
11100038	City of Martindale Drainage Improvements Study	Study of solutions to upgrade undersized stormwater drains and culverts.	11000009, 11000010	Caldwell	12100203	-	11000105, 11000109	2.1	Riverine	Martindale	00000255, 11003538, 00000010, 11001975, 11003473, 11003536, 11002343, 00000291, 00000392, 11003546, 11003540, 00000016, 00000258	No	\$100,000	Yes	Meets minimum TWDB requirements
11100039	City of Mountain City Repetitive Loss Structure Mitigation Study	Study of solutions to floodproof or otherwise mitigate repetitive loss structures that have been identified by FEMA for the number of flood insurance claims.	11000009, 11000010	Hays	12100203	-	11000110	0.5	Riverine	Mountain City	00001356, 00000026, 00002800, 00000307, 00002703, 00000291, 11003546, 00000258	No	\$150,000	Yes	Meets minimum TWDB requirements
11100043	City of New Braunfels - Box Culvert Installation to Reduce Flood Risk on Blieders Creek, Comal River and Landa Park Project Planning	Project planning for proposed drainage improvements project to reduce flooding in the Blieders Creek and German Creek watersheds by conveying flows to the Guadalupe River. The project is also intended to relieve flooding in the Landa Park area.	11000009, 11000010	Comal	12100202	-	11000042	0.4	Riverine	New Braunfels	11000583, 00000255, 00000014, 11003537, 00000291, 00002670, 11003546	No	\$878,000	Yes	Meets minimum TWDB requirements
11100044	City of New Braunfels Faust St / Nacogdoches Ave Improvements Project Planning	Study to analyze drainage conveyance and flooding issues within the Faust Street and Nacogdoches Avenue area and project planning for solutions within project area.	11000009, 11000010	Comal	12100202	-	11000043	0.1	Riverine	New Braunfels	00000255, 00000014, 11002265, 00000291, 00002670, 11003546	No	\$1,102,000	Yes	Meets minimum TWDB requirements
11100045	City of New Braunfels Dry Comal Creek Tributary East Watershed Project Planning	Study to analyze drainage conveyance and flooding issues within the Dry Comal Creek Tributaries East area (Kerlick Lane/Encino Drive/Mission Drive) and project planning for solutions within project area.	11000009, 11000010	Comal	12100202	-	11000042	1.1	Riverine	New Braunfels	00000255, 00000014, 00000291, 00002670, 11003546	No	\$344,000	Yes	Meets minimum TWDB requirements
11100047	City of New Braunfels Hunters Creek Regional Project Planning	Study to analyze drainage conveyance and flooding issues within the Hunters Creek area including the detention facility for the Westpointe development and project planning for solutions within project area.	11000009, 11000010	Comal	12100202	-	11000042	0.1	Riverine	New Braunfels	00000255, 00000014, 00000291, 00002670, 11003546	No	\$211,000	Yes	Meets minimum TWDB requirements
11100048	City of New Braunfels South Guadalupe Tributary Watershed Project Planning	Study to analyze drainage conveyance and flooding issues within the South Guadalupe River tributary area (Mesquite/Eastman/Oleander/Walnut Heights) and project planning for solutions within project area.	11000009, 11000010	Comal	12100202	-	11000042, 11000043	0.4	Riverine	New Braunfels	00000255, 00000014, 00000291, 00002670, 11003546	No	\$168,000	Yes	Meets minimum TWDB requirements
11100049	City of New Braunfels Dry Comal Creek West Watershed Project Planning	Project planning for solutions to minimize flooding issues within the Cedar Elm Street, Landa-Madeline drainage area.	11000009, 11000010	Comal	12100202	-	11000042	0.1	Riverine	New Braunfels	00000255, 00000014, 00000291, 00002670, 11003546	No	\$126,000	Yes	Meets minimum TWDB requirements
11100051	City of Niederwald Engineering Review of City Hall	Contract a consultation from an engineer to review the new City Hall building to ensure its resiliency (modular building that holds community documents and archives).	11000009, 11000010	Caldwell, Hays	12100203	-	11000111, 11000112	3.7	Riverine	Niederwald	11003546, 11003538, 11001856, 00000026, 11003534, 00000291, 11003539, 11002680, 00000392, 11003533, 00000016, 00000258	No	\$10,000	Yes	Meets minimum TWDB requirements
11100052	City of Nixon Voluntary Buyout Program Project Planning	Project planning to develop and implement a program to buyout NFIP repetitive loss properties.	11000009, 11000010	Gonzales, Wilson	12100202	-	11000075, 11000078, 11000079	1.6	Riverine	Nixon	00000255, 11003546, 00000282, 00000008, 00000291, 00000100, 00000264, 11002393	No	\$150,000	Yes	Meets minimum TWDB requirements

FME ID	FME Name	Description	Associated Goals	Counties	HUC8s	HUC12s	Watershed Name	FME Area (sqmi)	Flood Risk Type (Riverine, Coastal, Urban, Playa Other)	Sponsor	Entities with Oversight	Emergency Need (Y/N)	Estimated Study Cost (\$)	RFPG Recommendation (Y/N)	Reason for Recommendation
11100054	City of San Marcos Regional Detention Study	Study of solutions for regional detention and water quality strategies.	11000009, 11000010	Guadalupe, Caldwell, Hays	12100203	-	11000103, 11000102, 11000101, 11000106, 11000104, 11000107, 11000105	35.6	Riverine	San Marcos	00000255, 11003538, 00000010, 00000026, 00002800, 11003534, 11002343, 00000291, 11000387, 11003163, 00000392, 11003546, 11003540, 00000016, 00000258	No	\$200,000	Yes	Meets minimum TWDB requirements
11100055	City of San Marcos Modeling of Purgatory Creek and Willow Springs Creek Overflow Area	2-Dimensional Modeling of the Purgatory Creek and Willow Springs Creek Overflow Area	11000009, 11000010	Hays	12100203	-	11000103	0.4	Riverine	San Marcos	00000026, 11000387, 00000291, 11003163, 11003546, 00000258	No	\$271,000	Yes	Meets minimum TWDB requirements
11100056	City of San Marcos Low Water Crossing at Jackman Project Planning	Project planning to replace low water crossing at Jackman	11000001, 11000002	Hays	12100203	-	11000103	0.0	Riverine	San Marcos	00000026, 11000387, 00000291, 11003163, 11003546, 00000258	No	\$150,000	Yes	Meets minimum TWDB requirements
11100057	City of San Marcos Low Water Crossing at Mitchell and Purgatory Creek Project Planning	Project planning to replace low water crossing at Mitchell and Purgatory Creek	11000001, 11000002	Hays	12100203	-	11000103	0.0	Riverine	San Marcos	00000026, 11000387, 00000291, 11003163, 11003546, 00000258	No	\$200,000	Yes	Meets minimum TWDB requirements
11100058	City of San Marcos LWC at River Road and Railroad Trestle/Blanco River Project Planning	Project planning to replace low water crossing at River Road and Railroad Trestle/Blanco River	11000001, 11000002	Hays	12100203	-	11000101	0.0	Riverine	San Marcos	00000026, 11000387, 00000291, 11003163, 11003546, 00000258	No	\$150,000	Yes	Meets minimum TWDB requirements
11100059	City of San Marcos LWC at S LBJ and Purgatory Creek Project Planning	Project planning to replace low water crossing at S LBJ and Purgatory Creek	11000001, 11000002	Hays	12100203	-	11000103	0.0	Riverine	San Marcos	00000026, 11000387, 00000291, 11003163, 11003546, 00000258	No	\$150,000	Yes	Meets minimum TWDB requirements
11100060	City of San Marcos - Extension of River Ridge Parkway West Project Planning	Project planning for proposed project identified through the San Marcos Transportation Plan, to increase the ability to divert traffic during flooding events	11000009, 11000010	Hays	12100203	-	11000101	0.3	Riverine	San Marcos	11003538, 00000026, 11002343, 11000387, 00000291, 11003163, 00000392, 11003546, 00000258	No	\$298,000	Yes	Meets minimum TWDB requirements
11100061	City of Seguin Drainage Improvements Study	Study of solutions to increase drainage capacity, add stormwater detention and/or retention basins, and implement drainage improvements as deemed necessary to reduce flood risk.	11000009, 11000010	Guadalupe	12100202	-	11000045, 11000047, 11000044, 11000043, 11000049	38.3	Riverine	Seguin	00000255, 11003538, 00000010, 11002616, 11001045, 00000291, 00000392, 11003546, 00000821	No	\$1,100,000	Yes	Meets minimum TWDB requirements
11100062	City of Seguin Low Water Crossing Improvements Study	Study of solutions for drainage improvements at low water crossings.	11000001, 11000002	Guadalupe	12100202	-	11000045, 11000047, 11000044, 11000043, 11000049	38.3	Riverine	Seguin	00000255, 11003538, 00000010, 11002616, 11001045, 00000291, 00000392, 11003546, 00000821	No	\$1,500,000	Yes	Meets minimum TWDB requirements
11100063	City of Seguin Ingress Egress Improvements Project Planning	Project planning for proposed project to provide/construct additional means of access into single-entry neighborhoods; Update subdivision codes for a higher level of ingress and egress.	11000015, 11000016	Guadalupe	12100202	-	11000045, 11000047, 11000044, 11000043, 11000049	38.3	Riverine	Seguin	00000255, 11003538, 00000010, 11002616, 11001045, 00000291, 00000392, 11003546, 00000821	No	\$250,000	Yes	Meets minimum TWDB requirements
11100064	City of Seguin City-wide Drainage Improvements Project Planning	Project planning to increase Regional Detention, Channel & Drainage System Improvements.	11000009, 11000010	Guadalupe	12100202	-	11000045, 11000047, 11000044, 11000043, 11000049	38.3	Riverine	Seguin	00000255, 11003538, 00000010, 11002616, 11001045, 00000291, 00000392, 11003546, 00000821	No	\$200,000	Yes	Meets minimum TWDB requirements
11100065	City of Seguin Voluntary Buyout Program Project Planning	Project planning to develop an acquisition and elevation program in flood hazard areas. Elevate or acquire and demolish repetitive loss properties. Acquire high risk vacant land and maintain as open space.	11000009, 11000010	Guadalupe	12100202	-	11000045, 11000047, 11000044, 11000043, 11000049	38.3	Riverine	Seguin	00000255, 11003538, 00000010, 11002616, 11001045, 00000291, 00000392, 11003546, 00000821	No	\$300,000	Yes	Meets minimum TWDB requirements
11100066	City of Seguin Citywide Drainage Project Planning	Project planning for four priority drainage projects within the City of Seguin that would greatly improve the safety of their 25,520 residents. Project areas include North Guadalupe, North Heideke, Mays Creek and Walnut Branch.	11000009, 11000010	Guadalupe	12100202	-	11000045, 11000047, 11000044, 11000043, 11000049	38.3	Riverine	Seguin	00000255, 11003538, 00000010, 11002616, 11001045, 00000291, 00000392, 11003546, 00000821	No	\$4,304,000	Yes	Meets minimum TWDB requirements
11100067	City of Seguin Sewage Treatment Plant Floodproofing Project Planning	Project planning for proposed project to flood-proof sewage treatment plants in flood hazard / low-lying areas.	11000015, 11000016	Guadalupe	12100202	-	11000044	0.0	Riverine	Seguin	00000255, 11003538, 00000010, 11002616, 00000291, 00000392, 11003546	No	\$100,000	Yes	Meets minimum TWDB requirements
11100068	City of Umland Drainage Improvement Project Planning	Project planning for proposed project to mitigate against flooding by increasing the capacity of drainage routes to contain the storm water. Proposed drainage improvements will reduce flood waters backing up into the City.	11000009, 11000010	Caldwell, Hays	12100203	-	11000110, 11000111	2.8	Riverine	Umland	11002686, 11003538, 11003546, 00000026, 11002049, 00000291, 11003539, 00000392, 11003533, 00000016, 00000258	No	\$1,334,000	Yes	Meets minimum TWDB requirements
11100069	City of Victoria Drainage Improvement Study	Study of solutions to increase dimensions of drainage culverts in areas prone to flooding and/or drainage problems in various City locations.	11000009, 11000010	Victoria	12100204	-	11000130, 11000131, 11000147, 11000129	37.5	Riverine	Victoria	00003277, 00000588, 00002428, 11003546, 00000314, 00000291, 00000094, 00000264	No	\$1,000,000	Yes	Meets minimum TWDB requirements
11100070	City of Victoria Harden Critical Infrastructure Project Planning	Project planning to harden city buildings, critical infrastructure, and government buildings. Hardening of non-governmental facilities that have been identified as crucial in the response and recovery to/of emergencies and disasters.	11000015, 11000016	Victoria	12100204	-	11000130, 11000131, 11000147, 11000129	37.5	Riverine	Victoria	00003277, 00000588, 00002428, 11003546, 00000314, 00000291, 00000094, 00000264	No	\$100,000	Yes	Meets minimum TWDB requirements

11100071	City of Victoria Voluntary Buyout Program Project Planning	Project planning to implement a voluntary acquisition program for repetitive flood properties.	11000009, 11000010	Victoria	12100204	-	11000130, 11000131, 11000147, 11000129	37.5	Riverine	Victoria	00003277, 00000588, 00002428, 11003546, 00000314, 00000291, 00000094, 00000264	No	\$150,000	Yes	Meets minimum TWDB requirements
11100072	City of Victoria Flood Gate Project Planning	Project planning for proposed project to rehabilitate, repair, or replace the City of Victoria's existing flood gates, install additional flood gates as appropriate, and construct a storm water lift station in an area to be determined by study.	11000009, 11000010	Victoria	12100204	-	11000130, 11000131, 11000147, 11000129	37.5	Riverine	Victoria	00003277, 00000588, 00002428, 11003546, 00000314, 00000291, 00000094, 00000264	No	\$45,000	Yes	Meets minimum TWDB requirements
11100073	City of Victoria Regional Drainage Solutions Project Planning	Project planning for proposed project for five regional drainage solutions within the City: the Gardens Apartment diversion, Shenandoah ditch improvements, Anthony Road outfall improvements, Lone Tree Road outfall improvements, and Clegg Ditch outfall.	11000009, 11000010	Victoria	12100204	-	11000130, 11000131, 11000147, 11000129	37.5	Riverine	Victoria	00003277, 00000588, 00002428, 11003546, 00000314, 00000291, 00000094, 00000264	No	\$1,327,962	Yes	Meets minimum TWDB requirements
11100074	City of Victoria - Storm Sewer Improvements Project Planning	Project planning for project to replace storm sewer pipe under 18-inch diameter (29.9 miles). As a result of overland flow analysis and Storm Sewer System Level of Service Analysis, it was determined to replace all pipe less than 18-inch diameter.	11000009, 11000010	Victoria	12100204	-	11000130, 11000131, 11000147, 11000129	37.5	Riverine	Victoria	00003277, 00000588, 00002428, 11003546, 00000314, 00000291, 00000094, 00000264	No	\$3,946,100	Yes	Meets minimum TWDB requirements
11100075	City of Victoria Clean and Televis Storm Sewers Project Planning	Project planning for proposed project to clean and televise storm sewers (165.7 miles). As a result of overland flow analysis and Storm Sewer System Level of Service Analysis, it was determined to clean and televise storm sewers.	11000009, 11000010	Victoria	12100204	-	11000130, 11000131, 11000147, 11000129	37.5	Riverine	Victoria	00003277, 00000588, 00002428, 11003546, 00000314, 00000291, 00000094, 00000264	No	\$1,662,106	Yes	Meets minimum TWDB requirements
11100076	City of Victoria Regrade Priority Ditches and Driveway Culverts Project Planning	Project planning for proposed drainage improvements. As a result of a roadside ditch capacity evaluation, it was determined that 23 miles of ditch and 669 driveway culverts are negatively impacting conveyance capacity and need to be regraded.	11000009, 11000010	Victoria	12100204	-	11000130, 11000131, 11000147, 11000129	37.5	Riverine	Victoria	00003277, 00000588, 00002428, 11003546, 00000314, 00000291, 00000094, 00000264	No	\$1,165,853	Yes	Meets minimum TWDB requirements
11100077	City of Victoria Repair Channel Failures & Sediment Removal Project Planning	Project planning for proposed channel improvements. Using field visits and drone footage, it was determined to repair 33,657 sq ft of concreted lined channel, 11,829 sq ft of earthen channel, and remove 227,099 sq ft of sediment.	11000009, 11000010	Victoria	12100204	-	11000130, 11000131, 11000147, 11000129	37.5	Riverine	Victoria	00003277, 00000588, 00002428, 11003546, 00000314, 00000291, 00000094, 00000264	No	\$276,201	Yes	Meets minimum TWDB requirements
11100078	City of Victoria Stream Restoration Study	Study to implement a stream restoration/channelization program to ensure adequate drainage/diversion of storm water, throughout various City low water crossings, streambeds, creek sheds, tributaries, and riverine areas.	11000009, 11000010	Victoria	12100204	-	11000130, 11000131, 11000147, 11000129	37.5	Riverine	Victoria	00003277, 00000588, 00002428, 11003546, 00000314, 00000291, 00000094, 00000264	No	\$500,000	Yes	Meets minimum TWDB requirements
11100079	City of Waelder Voluntary Buyout Program Project Planning	Project planning to develop and implement a program to buyout NFIP repetitive loss properties.	11000009, 11000010	Gonzales	12100202	-	11000059	1.3	Riverine	Waelder	00000008, 11002395, 00000291, 00000264, 11003546	No	\$150,000	Yes	Meets minimum TWDB requirements
11100080	City of Wimberley Drainage Master Plan	Creation of drainage master plan for City of Wimberley to mitigate the flood hazard by defining priorities, policies, and strategies to address and remedy the drainage needs and challenges in Wimberley.	11000009, 11000010	Hays	12100203	-	11000099, 11000102, 11000098, 11000100	8.9	Riverine	Wimberley	00000026, 11002432, 11000387, 00000291, 11003546, 00000258	No	\$150,000	Yes	Meets minimum TWDB requirements
11100081	City of Wimberley FM 1492 at Blanco River Low Water Crossing Project Planning	Project planning for proposed project to replace low water crossing at FM 1492 at Blanco River	11000001, 11000002	Hays	12100203	-	11000099	0.0	Riverine	Wimberley	00000026, 11002432, 00000291, 11003546, 00000258	No	\$100,000	Yes	Meets minimum TWDB requirements
11100082	City of Wimberley Hidden Valley at Blanco River Low Water Crossing Project Planning	Project planning for proposed project to replace low water crossing at Hidden Valley at Blanco River	11000001, 11000002	Hays	12100203	-	11000100	0.0	Riverine	Wimberley	00000026, 11002432, 00000291, 11003546, 00000258	No	\$100,000	Yes	Meets minimum TWDB requirements
11100083	City of Wimberley Little Arkansas at Blanco River Low Water Crossing Project Planning	Project planning for proposed project to replace low water crossing at Little Arkansas at Blanco River	11000001, 11000002	Hays	12100203	-	11000100	0.0	Riverine	Wimberley	11003546, 00000026, 00000291, 00000258	No	\$100,000	Yes	Meets minimum TWDB requirements
11100084	City of Wimberley Valley Drive at Pierce Creek Low Water Crossing Project Planning	Project planning for proposed project to replace low water crossing at Valley Drive at Pierce Creek	11000001, 11000002	Hays	12100203	-	11000100	0.0	Riverine	Wimberley	00000026, 11002432, 00000291, 11003546, 00000258	No	\$100,000	Yes	Meets minimum TWDB requirements
11100085	City of Wimberley Flite Acres Road Low Water Crossing Project Planning	Project planning for proposed project to replace low water crossing at Flite Acres Road	11000001, 11000002	Hays	12100203	-	11000100	0.0	Riverine	Wimberley	00000026, 11002432, 00000291, 11003546, 00000258	No	\$100,000	Yes	Meets minimum TWDB requirements
11100086	City of Wimberley FM 1492 at Pierce Creek Low Water Crossing Project Planning	Project planning for proposed project to replace low water crossing at FM 1492 at Pierce Creek	11000001, 11000002	Hays	12100203	-	11000100	0.0	Riverine	Wimberley	00000026, 11002432, 00000291, 11003546, 00000258	No	\$100,000	Yes	Meets minimum TWDB requirements

11100011	City of Cibolo and Seguin USACE Study	Undertake a comprehensive study of flood risk and reduction alternatives, with the assistance of the U.S. Army Corps of Engineers. Project planning to implement feasible alternatives for flood reduction.	11000009, 11000010	Guadalupe	12100202	-	11000045, 11000047, 11000044, 11000042, 11000043, 11000049	59.2	Riverine	Cibolo	00000255, 00002615, 00000010, 00000282, 00002671, 11003538, 00001485, 00002973, 11002616, 11001045, 00003276, 00000291, 00000392, 11003546, 00000821	No	\$1,000,000	Yes	Meets minimum TWDB requirements
111000138	Cypress Creek Regional detention	Regional detention project on Cypress Creek that will reduce flooding through the unincorporated town of Comfort, TX and possibly provide enhanced aquifer recharge.	11000003, 11000004	Kendall	12100201	-	11000019, 11000021, 11000023	3.2	Riverine	Kendall	00000017, 00000022, 00000255, 00000291, 00000297, 11000923, 11003546	No	\$113,855	Yes	Meets minimum TWDB requirements
111000127	Upper Guadalupe River Authority Evaluation of Water and Sediment Control Facilities	Study to evaluate the flood benefits and cost-effectiveness of UGRA's existing nine Kerr County facilities. Evaluation would include H&H modeling and financial data to determine flood risk reduction. Results could guide decisions on future facilities.	11000009, 11000010	Kerr	12100201	-	11000001, 11000007, 11000024, 11000018, 11000020, 11000015, 11000009, 11000021, 11000017, 11000014, 11000016, 11000022, 11000013, 11000008, 11000002, 11000006, 11000011, 11000019, 11000010, 11000005, 11000003, 11000012, 11000004	1103.0	Riverine	Upper Guadalupe River Authority	11003543, 11003544, 11002585, 11000662, 11003546, 00000290, 00000255, 00000307, 00000291, 00000015, 00000339, 00000011, 11003545, 11003542, 00001401, 11003486, 00000022, 00000297, 00000268, 00000030, 00000017	No	\$250,000	Yes	Meets minimum TWDB requirements

**Table 16: Potentially Feasible Flood Mitigation
Projects Recommended by RFPG**

FMP ID	FMP Name	Description	Associated Goals (ID)	Counties	HUC8s	HUC12s	Watershed Name	Project Type	Project Area (sqmi)	Flood Risk Type (Riverine, Coastal, Urban, Playa, Other)	Sponsor	Entities with Oversight	Emergency Need (Y/N)	Estimated Project Cost (\$)	Potential Funding Sources and Amount	Cost/ Structure removed	Percent Nature-based Solution (by cost)	Negative Impact (Y/N)	Negative Impact Mitigation (Y/N)	Water Supply Benefit (Y/N)	Benefit-Cost Ratio	Social Vulnerability Index (SVI)	RFPG Recommendation (Y/N)	Reason for Recommendation
11300001	Detention on the Blanco River	The proposed dam height of 102 ft. and dam length of 1,840 ft. will provide a maximum storage capacity of approximately 1128 ac-ft.	11000009, 11000010	Blanco, Hays	12100203	-	11000059	Dam	6.34	Riverine	Kyle	00000008, 00000264, 00000291, 11002395, 11003546	No	\$933,800	-	\$71,000	0	No	-	Yes	-	0.18	Yes	Meets minimum TWDB requirements
11300006	Plum Creek Tributary 3 Arbor Knot Dr. Improvement	A proposed culvert improvement has been developed to convey a 1% ACE event. The proposed culvert improvement is to add one additional 8ft x 4ft culvert totaling three culverts at this location, and raising the finished deck elevation by 0.5ft.	11000009, 11000010	Hays	12100203	-	11000098	Infrastructure	0.02	Riverine	Blanco	00000026, 00000258, 00000291, 11002704, 11003546	No	\$557,000	-	\$0	0	No	-	No	<Null>	0.36	Yes	Meets minimum TWDB requirements
11300007	Plum Creek Tributary 4 Sledge Rd. Improvement	The proposed culvert improvement resulted in eight (7ft x 4ft) box culverts, needed to clear the roadway and to alleviate additional backwater flooding.	11000015, 11000010	Hays	12100203	-	11000107, 11000108, 11000106	Infrastructure	0.04	Riverine	Kyle	00000010, 00000255, 00000291, 00000392, 11000589, 11003538, 11003546	No	\$1,149,000	-	\$0	0	No	-	No	<Null>	0.24	Yes	Meets minimum TWDB requirements
113000010	65ft Channel Modification and Additional Culvert	The channel modifications consists of 65-ft bottom width channel modifications with 4:1 side slopes spanning from the North I-35 frontage road down past Goforth Road to Kym Way.	11000009, 11000010	Hays	12100203	-	11000075, 11000079	Comprehensive	0.19	Riverine	Kyle	00000008, 00000264, 00000282, 00000291, 11002393, 11003546	No	\$589,000	-	\$147,000	18.2	No	-	No	1.73	0.34	Yes	Meets minimum TWDB requirements
113000011	Plum Creek Detention Pond Upstream of IH35	This project consists of a detention pond between the railroad track and the South bound I-35 frontage road. Under this proposed alternative a 13-ft high dam wall would be placed on Plum Creek near Kyle Center Drive.	11000009, 11000010	Hays	12100203	-	11000130	Detention Pond	0.33	Riverine	Kyle	00000094, 00000264, 00000291, 00000588, 11003546	No	\$864,000	-	\$864,000	8.4	No	-	Yes	1.51	0.34	Yes	Meets minimum TWDB requirements
113000013	Wood Road/Landa Street Drainage Improvement	The drainage improvement project captures runoff east of Walnut Avenue and detains it in a 12-acre detention pond with 144 acre-feet of storage capacity. The pond outfall structure discharges to an existing channel south of Wood Road.	11000009, 11000010	Comal	12100202	-	11000107, 11000101, 11000102, 11000103, 11000104, 11000105, 11000106	Other	0.17	Riverine	New Braunfels	00000016, 00000026, 00000258, 00000291, 11000387, 00000392, 11001889, 11002343, 00002800, 11003163, 11003534, 11003538, 11003546	No	\$35,757,000	-	\$1,324,000	0	No	-	No	0	0.40	Yes	Meets minimum TWDB requirements
113000015	Improve Flood Warning Systems	Project includes enhancing stream flow gage network by increasing number of gages throughout community by at least six gages.	11000015, 11000016	Hays	12100203	-	11000098	Preparedness	25.69	Riverine	Woodcreek	00000026, 00000258, 00000291, 11002704, 11003546	No	\$339,000	-	\$0	0	No	-	No	0	0.59	Yes	Meets minimum TWDB requirements
113000026	Purgatory Creek Channel Improvement	Purgatory Creek Channel Improvement Project Preliminary Engineering Report	11000009, 11000010	Hays	12100203	-	11000099	Channel	0.20	Riverine	Waelder	00000026, 00000258, 00000291, 11003546	No	\$22,391,000	-	\$829,000	2.2	No	-	No	<Null>	0.54	Yes	Meets minimum TWDB requirements
113000027	Sherwood/Kingwood Drainage Improvements	Sherwood Drive and Kingwood Street Improvements Preliminary Engineering Report	11000009, 11000010	Hays	12100203	-	11000017, 11000016, 11000012, 11000013, 11000014	Infrastructure	0.03	Riverine	Waelder	00000022, 00000255, 00000291, 11002585, 11003544, 11003542, 11003545, 11003546	No	\$5,644,000	-	\$5,644,000	0	No	-	No	<Null>	0.63	Yes	Meets minimum TWDB requirements
113000035	Guadalupe Street Automatic Flood Gates	Place automatic flood gates with vehicle detection on inside of flooded area to allow for egress.	1.1E+14	Guadalupe	12100202	-	11000058, 11000060, 11000059	Preparedness	0.26	Riverine	Woodcreek	00000008, 00000264, 00000291, 11003546	No	\$115,000	-	\$0	0	No	-	No	-	0.75	Yes	Meets minimum TWDB requirements
113000036	Baldrige Creek Regional Detention Pond	Project includes constructing a regional detention pond on Baldrige Creek northwest of the City and would release runoff at a substantially lower flowrate, resulting in lower flood elevations on Baldrige Creek through the City of Waelder	11000009, 11000010	Gonzales	12100202	-	11000107, 11000101, 11000102, 11000103, 11000104, 11000105, 11000106	Comprehensive	0.97	Riverine	Woodcreek	00000016, 00000026, 00000258, 00000291, 11000387, 00000392, 11001889, 11002343, 00002800, 11003163, 11003534, 11003538, 11003546	No	\$2,075,000	-	\$43,000	2	No	-	Yes	-	0.72	Yes	Meets minimum TWDB requirements
113000037	Baldrige Creek Channel and Culvert Improvement and Detention Pond	Project consists of upstream regional detention pond plus a 50 ft. bottom width channel modification with 3:1 side slopes downstream of SH 97 and the addition of two 10 X 10 box culverts under SH 97.	11000009, 11000010	Gonzales	12100202	-	11000103	Comprehensive	0.29	Riverine	Comal	00000026, 00000258, 00000291, 11000387, 11003163, 11003546	No	\$3,928,000	-	\$45,000	2	No	-	No	0.78	0.72	Yes	Meets minimum TWDB requirements
113000039	Wilson Creek - Green Acres Dr. Improvement	A proposed updated culvert geometry consists of 11 box culverts (10ft-12ft) and a raised finished deck elevation (3ft rise).	11000009, 11000010	Hays	12100203	-	11000110, 11000111	Infrastructure	0.02	Riverine	Gonzales	00000026, 00000034, 00000258, 00000291, 00000307, 0000862, 00001323, 11002217, 00002700, 00002799, 00002800, 11003533, 11003546	No	\$1,246,000	-	\$0	2	No	-	No	<Null>	0.23	Yes	Meets minimum TWDB requirements
113000040	Regional Detention South of Mountain Crest Drive	The alternative consists of a 20 ft. tall detention structure with a 175 ac-ft detention capacity. The outflow control would consist of culverts for low flow and an overflow weir for high flow.	11000009, 11000010	Hays	12100203	-	11000014	Detention Pond	0.10	Riverine	Wimberley	00000022, 00000255, 00000291, 11002585, 11003545, 11003546	No	\$946,000	-	\$118,000	0	No	-	Yes	-	0.11	Yes	Meets minimum TWDB requirements
113000041	Improvements to Brookside Drive Culvert Crossing	The culvert opening will be increased to three 36" concrete pipes to match the culvert capacity just downstream at Brook Meadow Dr. and also involve some minimal re-grading of the stream flowline.	11000009, 11000010	Hays	12100203	-	11000110	LWC upgrade	0.00	Riverine	San Marcos	00000026, 00000258, 00000291, 00002800, 11003533, 11003546	No	\$38,000	-	\$0	0	No	-	No	-	0.00	Yes	Meets minimum TWDB requirements
113000042	Brookmeadow Drive Drainage Improvements	The proposed alternative consists of a rip rap ditch along the south side of Brookmeadow Drive, under Overbrook Court and down to Hog Creek with capacity to contain the most frequent flows.	11000009, 11000010	Hays	12100203	-	11000110	Channel	0.00	Riverine	San Marcos	00000026, 00000258, 00000291, 00002800, 11003533, 11003546	No	\$65,000	-	\$0	0	No	-	No	-	0.11	Yes	Meets minimum TWDB requirements
113000044	Regional Detention on Bear Creek	The proposed dam height of 85 ft. and dam length of 620 ft. will provide a maximum storage capacity of approximately 3,375 ac-ft.	11000009, 11000010	Comal	12100202	-	11000042	Detention Pond	6.74	Riverine	Seguin	00000014, 00000255, 00000291, 00002670, 11003546	No	\$6,973,000	-	\$44,000	0	No	-	Yes	3.53	0.48	Yes	Meets minimum TWDB requirements
113000047	Regional Detention on Peach Creek	A 29 ft. high dam with a length of 5780 ft. would provide approximately 41,774 ac-ft of storage. This site would be able to store a large volume of water and greatly reduce the peak from the Peach Creek watershed.	11000009, 11000010	Gonzales	12100202	-	11000099, 11000095, 11000096, 11000097, 11000098, 11000100	Detention Pond	7.37	Riverine	Kerr	00000014, 00000026, 00000031, 00000255, 00000258, 0000291, 00000307, 11002432, 11003546	No	\$7,821,000	-	\$652,000	0	No	-	Yes	0.77	0.72	Yes	Meets minimum TWDB requirements

FME, FMS, FMP One Pagers

Flood Management Evaluation (FME)

Title **City of Buda Dam Study**

ID# **111000012**

Sponsor (name of entity, not person) **Buda (Municipality)**

RFPG recommend? **Yes** Reason for Recommendation **Meets minimum TWDB requirements**

Study Details

Study type **Preparedness**

Study description **Study to evaluate dam failure risks, planning for structural and nonstructural measures to protect the integrity of the earthen fill dams.**

New Hydrologic or Hydraulic model? **Yes** Emergency Need? **No** Existing/Anticipated models in near term? **Yes**

County **Hays** Watershed HUC# (if known) **12100203**

Drainage area (Square miles, est.) **9** Goal(s) **11000009, 11000010**

100-Year Flood Risk Summary

Population at risk **4** # of structures **3** Critical facilities **0**

Flood risk type: Riverine? **Yes** Coastal? **No** Local? **No** Playa? **No** Other? **No**

Farm/Ranch land impacted (acres) **8** Roadway(s) impacted (length) **1**

Number of low water crossings **1** Historical road closures **-**

Estimated Cost and Funding Availability

Total Cost **\$500,000** Amount of Available Funding **TBD** Federal funding availability **TBD**

Funding source **TBD**

Flood Management Evaluation (FME)

Title **City of Seguin Ingress Egress Improvements Project Planning**

ID# **111000063**

Sponsor (name of entity, not person) **Seguin (Municipality)**

RFPG recommend? **Yes** Reason for Recommendation **Meets minimum TWDB requirements**

Study Details

Study type **Preparedness**

Study description **Project planning for proposed project to provide/construct additional means of access into single-entry neighborhoods; Update subdivision codes for a higher level of ingress and egress.**

New Hydrologic or Hydraulic model? **No** Emergency Need? **No** Existing/Anticipated models in near term? **Yes**

County **Guadalupe** Watershed HUC# (if known) **12100202**

Drainage area (Square miles, est.) **38** Goal(s) **11000015, 11000016**

100-Year Flood Risk Summary

Population at risk **3,190** # of structures **846** Critical facilities **5**

Flood risk type: Riverine? **Yes** Coastal? **No** Local? **No** Playa? **No** Other? **No**

Farm/Ranch land impacted (acres) **1,157** Roadway(s) impacted (length) **25**

Number of low water crossings **8** Historical road closures **-**

Estimated Cost and Funding Availability

Total Cost **\$250,000** Amount of Available Funding **TBD** Federal funding availability **TBD**

Funding source **TBD**

Flood Management Evaluation (FME)

Title **Comal County Evacuation and Dam Safety Plan**

ID# **111000096**

Sponsor (name of entity, not person) **Comal (County)**

RFPG recommend? **Yes** Reason for Recommendation **Meets minimum TWDB requirements**

Study Details

Study type **Preparedness**

Study description **Develop evacuation and dam safety plan for coordination with USACE and dam re-enforcement.**

New Hydrologic or Hydraulic model? **No** Emergency Need? **No** Existing/Anticipated models in near term? **Yes**

County **Comal** Watershed HUC# (if known) **12100203, 12100202, 12100201**

Title **Comal County Voluntary Buyout Program Project Planning**

ID# **111000098**

Sponsor (name of entity, not person) **Comal (County)**

RFPG recommend? **Yes** Reason for Recommendation **Meets minimum TWDB requirements**

Study Details

Study type **Project Planning**

Study description **Project planning to remediate repetitive losses along the Guadalupe River by acquiring flood damaged structures and converting acquired land to open(green)space.**

New Hydrologic or Hydraulic model? **Yes** Emergency Need? **No** Existing/Anticipated models in near term? **Yes**

County **Comal** Watershed HUC# (if known) **12100203, 12100202, 12100201**

Drainage area (Square miles, est.) **573** Goal(s) **11000003, 11000004, 11000009, 11000010**

100-Year Flood Risk Summary

Population at risk - # of structures - Critical facilities -

Flood risk type: Riverine? **Yes** Coastal? **No** Local? **No** Playa? **No** Other? **No**

Farm/Ranch land impacted (acres) - Roadway(s) impacted (length) -

Number of low water crossings - Historical road closures -

Estimated Cost and Funding Availability

Total Cost **\$357,000** Amount of Available Funding **TBD** Federal funding availability **TBD**

Flood Mitigation Project (FMP)

Title

ID# Sponsor

RFPG recommend? Reason for Recommendation

Project Description

A proposed culvert improvement has been developed to convey a 1% ACE event. The proposed culvert improvement is to add one additional 8ft x 4ft culvert totaling three culverts at this location, and raising the finished deck elevation by 0.5ft.

**Appendix 10-A | Summary Memorandum of
Pre-Planning Meeting August 4, 2021**

Memorandum

To: Lauren Willis –Director of Regulatory & Customer Affairs, Guadalupe-Blanco River Authority
Jay Scanlon, PE, CFM, ENV SP – Project Manager, Freese & Nichols, Inc.
Adam Conner – Assistant Project Manager, Freese & Nichols, Inc.

From: Velma R. Danielson, Project Manager/Public Involvement Lead, Blanton & Associates
Alicia Reinmund-Martinez, Deputy Project Manager

Date: August 17, 2021

Re: **Summary Report – Guadalupe Regional Flood Planning Group Pre-Planning Public Meeting – August 4, 2021**

The Region 11 Guadalupe Regional Flood Planning Group (RFPG) held their second pre-planning public meeting on Wednesday, August 4, 2021 as an item on their regular monthly RFPG meeting agenda. The purpose of this agenda item was to solicit public input regarding suggestions and recommendations on the development of the Guadalupe Regional Flood Plan. Below is a summary of the meeting discussion related to this agenda item.

Meeting Attendance

There were 61 attendees, (16 RFPG members, seven elected officials, 32 members of the public, one Guadalupe-Blanco River Authority (GBRA) staff member and eight members of the consultant team assisting the Guadalupe RFPG with developing the 2023 Guadalupe Regional Flood Plan), at the August 4, 2021 Guadalupe RFPG Meeting. Sign-in sheets are included in **Appendix A**.

Pre-Planning Public Meeting Format

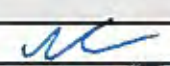

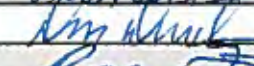

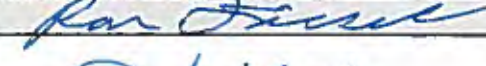

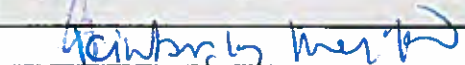

While the Guadalupe RFPG regular monthly meeting began at 4:02 p.m., the pre-planning public meeting agenda item began at approximately 5:20 p.m. Chairman Doug Miller reviewed the guidelines for those wanting to provide public comments. Chairman Miller also stated that RFPG members would not be addressing comments during the meeting as this was their opportunity to hear from the public. He then opened the meeting for public input. Eleven individuals spoke and provided comments, with one speaker submitting copies of emails and letters concerning flood planning and potential solutions. A matrix of the stakeholder and public comments received is found in **Appendix B**, and the emails and letters submitted are found in **Appendix C**. The meeting adjourned at 6:02 p.m.

If you have any questions, please let us know.

Appendix B

Matrix – Stakeholder/Public Comment

NAME/AFFILIATION	STAKEHOLDER/PUBLIC COMMENTS
<p style="text-align: center;">Dianne Wassenich/ Individual</p>	<ul style="list-style-type: none"> • Mrs. Wassenich is a resident of San Marcos. She indicated that she was very interested and concerned about recreational development within floodplain. • She noted that during future flooding events, debris from these developments could potentially become a “battering ram” downstream. • Mrs. Wassenich also emphasized that land conservation measures, especially of riparian areas and in the 100-year flood plain, need to be implemented. • She suggested that these lands should be bought, and that funding for this measure should be the highest priority. • Mrs. Wassenich also suggested that land at higher elevations should be open and undeveloped. • Mrs. Wassenich stated that the City of San Marcos did a “sensible” thing by increasing the elevation at which development can occur and changing the floodplain elevation from 1ft to 2ft. • She would like the floodplain raised from 1ft to 2ft elsewhere. • Lastly, Mrs. Wassenich emphasized the importance of purchasing land.
<p style="text-align: center;">Gary Louie/Individual</p>	<ul style="list-style-type: none"> • Mr. Gary Louie is a resident of Comfort, Texas. • Mr. Louie noted that the funding for an early warning system is of importance. • Mr. Louie provided several letters to the RFPG regarding an early warning system and concern for loss of life, and he stated that the funding of an early warning system is affordable and timely. • Mr. Louie also stated that restrictors and retention devices will result in less property damage and provide some long-term economic benefits. • Mr. Louie would like to ensure that any projects keep the downstream in mind.

NAME/AFFILIATION	STAKEHOLDER/PUBLIC COMMENTS
<p style="text-align: center;">Bob Mayo/ Individual</p>	<ul style="list-style-type: none"> • Mr. Bob Mayo is a resident of Comfort. • Mr. Mayo was interested to know how much funding is available for these projects. • Mr. Mayo also mentioned that people have been getting drinking water out of Cypress Creek. • He noted that development on the land between the Cypress Creek and the river is not possible and suggested turning the area in to a lake. • Mr. Mayo also cited a concern over the pumping of water to the cities. • Mr. Mayo asked if desalination studies have been completed. • Mr. Mayo would like to keep farmland in consideration during flood planning.
<p style="text-align: center;">Linda Bishop/ Individual</p>	<ul style="list-style-type: none"> • Mrs. Linda Bishop, a landowner on Lake Gonzales, expressed concern regarding a non-responsive gate on the dam. • She stated that the gates were up and down throughout the day of August 4th. • Mrs. Bishop also noted that a news service came to her property to report on the issues at the dam. • Mrs. Bishop also expressed concern over the homes in Gonzales and Cuero that were destroyed and is afraid that will happen to her property. • She stated that as of August 3rd, both gates were down at the Lake Gonzales Dam. • Mrs. Bishop stated that “those dams need to be in place for the next flood. Now there is no H-5, and no dam for Lake Gonzales.” • Mrs. Bishop noted that she is afraid Lake Gonzales will be drained like Lake Dunlap. • Mrs. Bishop wanted to clarify that she did not contact the news service to come to her property.

NAME/AFFILIATION	STAKEHOLDER/PUBLIC COMMENTS
<p style="text-align: center;">Sara Dishman/ Individual and former City of Wimberley Councilmember</p>	<ul style="list-style-type: none"> • Mrs. Sara Dishman stated that she is a Hays County resident and a former City of Wimberley Councilmember. • Mrs. Dishman noted that rock wall structures with stairs have been built along the river to create easy access to the river. • Mrs. Dishman emphasized that this development was dangerous. • Mrs. Dishman stated that she was present during the flood in 2015. She noted that six years have passed, and people have forgotten. • Mrs. Dishman commented that current officials are not making flood planning a priority. • Mrs. Dishman emphasized the importance of disseminating information to local governments, and said that communication is lacking, and that city elected officials are not aware of flooding issues. • She then cited the lack of communication has led to local governments not enforcing rules, which would have prevented the development of the rock walls along the river. • Mrs. Dishman wanted construction activities along the river to be better enforced and regulated. • Mrs. Dishman wanted to ensure that municipalities have the information needed so that the rules don't change when the people in charge change. • Mrs. Dishman wanted rule enforcement to be more consistent from the City of Wimberley and believed there is a gap in communication between the City of Wimberley and the citizens.
<p style="text-align: center;">Commissioner Jonathan Letz/ Kerr County</p>	<ul style="list-style-type: none"> • Commissioner Letz noted that Kerr County is part of five river basins, making it difficult to plan for. He encouraged that there should be direct communication with county judges and mayors. • Commissioner Letz stated that conservation priorities will have a huge impact on water quality and runoff. • Commissioner Letz noted that he would like to take into consideration conservation efforts, partner with NRCS, and keep water quality in mind. • Commissioner Letz also noted that RV parks need to be looked at. • Commissioner Letz notified the RFPG that Kerr County will be submitting three flood planning projects, and he wanted to know how to do that and what the deadline for submission was. • He also stated that there will be two joint projects from Kendall/Kerr counties that will be submitted to the RFPG.

NAME/AFFILIATION	STAKEHOLDER/PUBLIC COMMENTS
<p style="text-align: center;">Dennis Engelke/ Caldwell County staff</p>	<ul style="list-style-type: none"> • Mr. Engelke stated that Caldwell County has been identified as a natural disaster county many times. • Mr. Engelke stated that flood planning will take a collaborative effort. He wanted to work collaboratively with this RFPG. • He encouraged county officials to get involved in the flood planning process. • Mr. Engelke noted that Caldwell County has applied for a grant to develop a (flood) management plan and has utilized existing resources. • He suggested that others take advantage of the existing resources, such as TWDB grants. • Mr. Engelke also noted that Caldwell County is involved in a buy-out program to turn previously flooded properties into green space. • Mr. Engelke wanted to encourage local governments to work together to solve this problem and thanked the RFPG for being an available collaborative resource. • Mr. Engelke also made note of the growth in Caldwell County.
<p style="text-align: center;">Raymond Slade/Individual</p>	<ul style="list-style-type: none"> • Mr. Slade submitted his comments through the Guadalupe RFPG Virtual Public Meeting website. He requested that the following comments be read to the RFPG: “As a hydrologist my studies have included the Guadalupe River. I published a report about flood peaks on the river. The study documents that annual peaks have increased 38 % for the river at Spring Branch. Because of this the 100-year flood plain as published is too low. This is because the flood plain is based on historic data but does not represent increased floods. I was in contact with NOAA about Atlas 14 which represents the current floodplain. They agree with me about this problem but do not have the authority to include increased floods in the creation of the current Guadalupe River floodplains. Any questions about this can be sent to me.”
<p style="text-align: center;">Kari Potter/Individual</p>	<ul style="list-style-type: none"> • Mrs. Potter was concerned about proposed high density developments in eastern Kerr County near the Guadalupe River. • She expressed concern that these developments and their impervious cover will have runoff that will go directly into the Guadalupe River and potentially impact drinking water downstream She noted that there will be 300 houses and RV lots. • Mrs. Potter commented that high density developments could be an issue and was concerned about their environmental impact.

NAME/AFFILIATION	STAKEHOLDER/PUBLIC COMMENTS
<p style="text-align: center;">Mark Gleason/ City of San Marcos Councilmember</p>	<ul style="list-style-type: none"> • Mr. Gleason stated that he was acting on his own behalf. His property was flooded twice in 2015. • He mentioned that the Blanco River doesn't have any flood control measures and wanted to know if there have been any studies completed. • Mr. Gleason stated that "we should be looking at this (flood planning) regionally." • Mr. Gleason wanted the group to look at the Blanco River. He noted that the Blanco River has thousands of structures built within the floodplain that can't be bought out. • He emphasized that there is a need to implement projects for the Blanco.

Via email

Dear Don,

I have lived in Comfort for 36 years. My husbands' family has lived here since the early late 1900s. Our interest in flood management planning arises from both personal observation and historic understanding of the confluence of the Guadalupe River and Cypress Creek. We applaud comprehensive floodplain management strategies that consider structural and nonstructural programs on both waterways.

We support state and local flood mitigation plans that can reduce disaster losses and break the cycle of disaster damage, reconstruction, and repeated damage. Measures that arise from this work will save lives and advance community endorsed initiatives such as capital improvements, economic development, environmental quality, and riparian preservation.

Stream monitoring and early warning notification systems for flash flooding on Cypress Creek would be relatively low-cost and life saving measures that would allow residents and emergency services to respond quickly and appropriately. We consider this to be a priority.

Given that increased development along the Cypress Creek is occurring and will continue to escalate, stream monitoring will also allow us to better understand the impact of growth on the nature of flooding and quality of the water source.

Flood control on the Guadalupe River is also critical to the community. Of particular concern are the effects of high magnitude, low frequency flooding that damages the bedrock channel stream of the river. The effects of gravel deposits over time in the base flow channel chokes effective drainage at meanders and tributaries such as the point of confluence of the Guadalupe River and Cypress Creek. This increases the threat of flooding in the community and forces flood water to scour the natural riparian functions of the banks on both water ways.

Structural methods such as retention ponds or levees, and diversion channels along the Guadalupe River and the Cypress Creek, where feasible, would provide an opportunity to control rising water more effectively reducing damage to properties. Integrating retention and detention measures into developments, using floodplains for green space or parks that will hold and spread out water during floods could be beneficial. Such measures provide improved safety of all downstream communities, offer a chance to develop alternative water sources for residents of the area or enhance recreational options.

Thank you for the opportunity to address the Guadalupe Region 11 Flood Planning Group through this letter and your volunteer service on the committee.

Sincerely,

Beth Bourland

Commissioner Durden,

3 August 2021

I am writing as an individual stakeholder and as an interested party of the Comfort Floodplain Coalition to voice my support for stream monitoring stations & early high water/flood warning systems in and around Comfort and upstream on the Cypress and Guadalupe stream/river systems. As you are aware, in our community Cypress Creek has no flow or height monitoring installations, resulting in deadly surprises, giving emergency services little to no warning to evacuate residents, close roads and save lives. Early warning and stream monitoring may be considered small, but it can be very effective at saving lives and providing important historical data to improve future decision making.

At the same time, I believe no flood mitigation project In the Guadalupe River Basin (GRB) should be disregarded because of cost. The various projects underway and the execution of a GRB Flood Master Plan will be critical to all entities in the GRB, especially Kendall County. Easier said than done because of the many jurisdictions involved.

For our community, I believe an early warning system is our closest “alligator to the boat” and the most cost-effective item of the many other projects, such as retention dams, that may take years or even decades to implement.

Sincerely,
Craig McDonald

Doug Miller, Chair
Guadalupe Regional Flood Planning Group #11

cc: Kendall County Commissioner Don Durden

Chairman Miller and Planning Group,

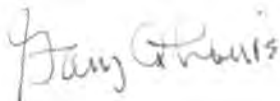

Even though my wife and I do not live directly in the floodplain or floodway of the Guadalupe River or associated tributaries, we are quite concerned about the safety, security, and general economic impact of flooding along the watershed in Comfort.

I appreciate that issues of drainage, retention, and flooding can be complicated and expensive. The heavy rain events during the past few months have brought to light how quickly streams and tributaries can fill, causing dangerous situations for residents and travelers, especially at low water crossings.

My first suggestion for the Planning Group is to consider **funding of an Early Warning System** to protect lives. My understanding is that a system of this nature is affordable and can be implemented in at reasonable time frame.

Longer term, I hope that the Planning Group will **invest in flood control measures** that eventually will help control problems downstream. Thoughtful development of restrictors and retention devices both save lives and protect property, but have the added benefits of creating much needed water supplies as well as economic benefits for the region and state.

Your efforts to address flooding is much appreciated,

Gary A. Louie

Guadalupe Regional Planning Group
August 2, 2021

Dear Committee Members:

As property owners in Comfort, Texas, and more specifically, property owners affected by potential flooding of Cypress Creek, my wife and I encourage the committee to seriously support all efforts to mitigate flooding of this waterway. Our property is located at 228 Broadway Street.

Due to the history of flooding on Cypress Creek, structural mitigation projects are definitely the most advantageous actions to be taken to alleviate this problem. Such projects can potentially reduce the flooding itself, while also providing additional fresh water supply for the Comfort area. Such structural mitigation could go far to prevent loss of life and property damage.

Additionally, the installation of stream monitoring stations and early warning systems on Cypress Creek will provide emergency services time to warn and evacuate those residents living nearby. My wife's mother and step-father were evacuated on two separate occasions from this property when Cypress Creek flooded during night time hours.

Based upon historical events, the Cypress Creek area should be a prime candidate to receive funds to finance drainage, flood mitigation, and flood control projects along this waterway.

Sincerely,

William G. Mears

Subject: Flood planning meeting

Don, please push for a complete and safe flood resolution. I have lived on the Guadalupe river since I was 8 years old and have dealt with it's flooding for years, I'm 72 now. For the protection of our homes, animals, human life, our businesses...we must improve things!

Thanks you for all your hard work and dedication to our community needs.

To: don.durden@co.kendall.tx.us
Subject: Ref: Flood protection in the Comfort area

Dear Commissioner Durden,

Many thanks for your continued efforts to promote flood mitigation and early warning systems in the elevations above Comfort. The recent establishment of the Guadalupe Regional Flood Planning Group give us a great opportunity to present our ideas and eventually get the appropriate funding to relieve property damage and loss of life as the result of flooding on the Guadalupe River and Cypress Creek.

I suggest the first order of business would be to install automated early warning systems which can be done at minimal expense then followed by structural solutions such as off channel reservoirs, aquifer storage and recharge wells, and aquifer recharge dams.

During heavy rains the Highway 27 bridge across Cypress Creek always gets blocked by dead trees creating a dam that backs up water into the nearby homes and businesses. An effort should be made to clear out the creek bed (with the consent of the landowners) for some distance, say a quarter of a mile, upstream of the bridge.

Thanks again for your help.

Steve Spence

Subject: Region 11 Flood Planning Group

Dear Commissioner Durden:

I am writing to urge the Regional Planning Group 11 to address the flooding issues, lack of early warning and need for surface water supply in the Comfort area, especially relating to Cypress Creek.

Specific items I urge the Group to consider include the following:

- To prevent loss of life and property, structural mitigation is the preferred type of project, especially when constructed in such a way that the structure not only reduces flooding, but also adds a new fresh water supply and potential recreational benefits.
- To prevent loss of life only, stream monitoring stations & early warning systems are essential and very cost effective. Large tributaries, such as the Cypress Creek, have no flow or height monitoring installations, resulting in deadly surprises, giving emergency services little to no warning to evacuate residents, close roads and save lives. These devices will also provide historical data to better understand flooding in Texas.
- Cost benefit calculations must take into account flood impact mitigation/protection in downstream communities all the way to the coast, as well as any benefits related to increased fresh water supply, quality of life and recreational implications. Reducing flooding in Comfort reduces flooding dangers in Sisterdale, Bergheim, Spring Branch, Canyon Lake, San Marcos, etc., and those benefits should be taken into account.
- Taking water supply into account is essential and will show that many structural flood mitigation projects are economically feasible due to the multiple positive effects of said structures. You cannot ignore the water supply benefits when areas such as Western Kendall County are forecast to suffer severe water shortages over the next 40 years, according to the 2010 Regional Water and Wastewater Study conducted by AECOM.
- No minimum project should be disregarded. Early warning and stream monitoring may be inexpensive and considered small, but it is very effective at saving lives and providing important historical data to improve decision making in the future.

Thank you for your time and consideration of these suggestions and issues.

Regards,

Carol & Ruben Trono

To Regional Planning
Group 11.

First, we would like to extend our appreciation with the volunteers, who in their efforts, are committed to the general management of problem solving, strategizing and striving for improvements dealing with pre and post flood consequences.

We are aware of the negative impacts with flooding in our community and have directly experienced the destruction of our homes on Water Street, Broadway and surrounding neighborhoods, which caused displacement and loss of property. The loss of loved ones, although indirectly, had a deeper impact that was traumatic for all of us in the years past. The experience of hesitation, fear and facing an indecisive state of mind during impending floods has been emotionally overwhelming for many residents. In the past and present we rely on communication from local news-worthy channels, community fire departments, networking and other resources of information focusing on current weather conditions, flood warnings, etc. Those of us living in the flood zone areas rely on the senses of past experiences and can determine a more rapid direction of thought, however, they must still follow direction from local emergency organizations and responders connected with the community.

In 2016, Comfort, Texas experienced a flash flood event that completely overwhelmed the community, without warning, no communication of evacuation within flood zone, no efforts in providing barriers, no visible signs of responders going door to door reaching out to evacuate, as in the past. We all know how devastating it is to succumb to these forces of nature beyond our control.

Regarding "who" should be responsible in providing flood warning systems is still uncertain to most of us. We truly believe that Education should be an important variable in allowing influences on all opinions, setting clear lines of responsibility, coordinating flood information that dispenses heightened awareness within the local flood zone community. Our families have been to Town meetings when topics are introduced for the purpose of communication or Q & A's involving community input. Comfort flood zone residents would have a better outcome and be more effective in understanding the strategies and preparing ahead with group meetings such as Comfort Floodplain Coalition provides. This group is a new avenue for our family and will certainly take the opportunity to be more proactive in the involvement and information it provides.

Our opinion...We need a more reliable flood warning system along with better flood preparedness measures so that people in this community can take action that further minimizes flood destruction of life and property. Too many years have passed in the attempts of minimizing flood impacts. Why are the creek beds and rivers still without sensors, devices and dams that could minimize the flow of flood waters and send out alerts? We understand the funding issues, budgets and constraints along with all the Regional and State involvement; however, the frustration lies within those who can make decisive action plans. We need greater clarity on responsibility for issuing effective flood warnings.

Thank you for the opportunity in hearing our sincere opinions and thoughts relating to Flood issues at hand.

Respectfully,

Yolanda Arizola

Emmanuel Flatten
417 Water St.
Comfort, Texas

To Regional Planning Group 11:

Thank you for your efforts to improve Texans' safety and security by addressing the significant flood dangers along the Guadalupe River and major tributaries. To achieve such ends, I believe stream monitoring, early warning and structural flood mitigation are necessary on the Cypress Creek, upstream of Comfort, Texas.

In 2016, a flash flood on the Cypress Creek surprised residents sleeping in their beds and emergency responders alike. With no warning, everyone was caught off guard, resulting in the death of a young woman. Her car was swept away less than thirty feet from my property line. A small memorial near my home reminds me of her family's loss daily. Had flow monitoring and early warning been in place, their tragic loss may have been avoided. Had structural mitigation been in place, the waters might never have reached homes in the first place.

I implore you to prioritize projects near the community of Comfort, and take the following into account:

Prevent loss of life by implementing stream monitoring stations & early warning systems, which are essential and very cost effective. Large tributaries, such as the Cypress Creek, have no flow or height monitoring installations, resulting in deadly surprises, giving emergency services little to no warning to evacuate residents, close roads and save lives. These devices will also provide data to better understand flooding in Texas.

Prevent loss of life and property by implementing structural flood mitigation. Cost benefit calculations should consider flood protection in downstream communities all the way to the coast, as well as any benefits related to increased fresh water supply, quality of life and recreation. Peak flow reduction in Comfort reduces flood dangers in Sisterdale, Bergheim, Spring Branch, Canyon Lake, etc.

Structural flood mitigation projects are economically feasible when the multiple positive effects are considered. The potential increase to water supply should not be ignored when areas such as Western Kendall County are forecast to suffer a 50% water supply shortfall by 2040, according to the 2010 Regional Water and Wastewater Study conducted by AECOM.

Thank you for the opportunity to make our voices heard and for working toward the betterment of Texan lives.

Sincerely,

Emmanuel Flatten

3 August 2021

To: Region 11 Flood Planning Group, Meeting 8/4/2021, Wimberly TX

Subject: Proposition 8 legislation, "The constitutional amendment providing for the creation of the flood infrastructure fund to assist in the financing of drainage, flood mitigation, and flood control projects."

My spouse and I are long-time residents of Kendall County, residing in Comfort near the confluence of the Guadalupe River and Cypress Creek. Our residence/property is on Cypress Creek (highway 27 bridge). I am also a 'grassroots' member of the Comfort Floodplain Coalition (CFC) which, since its inception in 2011, has been seeking ways to mitigate flooding in the greater Comfort area, which as you know is subject to significant flooding events resulting in property damage and most importantly, loss of lives.

To that end I offer some feedback/comments as requested by the organizers of this Region 11 Planning Group:

Structural mitigation, e.g. upstream dam(s), retention ponds (in Kerr County) is the preferred type of project, especially when constructed in such a way that the structure not only reduces flooding, but also adds a new fresh water supply and potential recreational benefits.

To prevent/minimize loss of life, stream monitoring stations & early warning systems are essential and very cost effective. Large tributaries, such as Cypress Creek, have no flow or height monitoring installations, resulting in deadly surprises, giving emergency services little to no warning to evacuate residents, close roads, etc. No minimum project should be disregarded. Early warning and stream monitoring may be relatively inexpensive, but it is very effective at saving lives.

As well, reducing flooding in Comfort reduces downstream flooding/dangers in Sisterdale, Bergheim, Spring Branch, Canyon Lake, San Marcos, etc.

These measurement systems/devices will also provide historical data to better understand flooding in Texas.

Upstream structural flood mitigation projects will concurrently enhance the water supply and benefits areas of Western Kendall County which are forecast to suffer severe water shortages over the next 40 years (according to the 2010 Regional Water and Wastewater Study conducted by AECOM).

I trust that the above comments are of considered value to the Region 11 Flood Planning group work efforts.

Sincerely,
Kurt Solis

Amy Sinclair
Comfort, TX 78013

August 1, 2021

Regional Planning Group 11:

I appreciate your efforts to address flooding issues affecting communities along the Guadalupe River. Living on Cypress Creek for 17 years, I've experienced two significant floods and can attest to the need for reliable early warning systems in our area. Every time we have substantial rainfall, I suffer anxiety knowing there is no flood protection whatsoever, and I might receive no warning before the floodwaters enter my bedroom.

As I'm sure you're aware, Comfort's population has been growing faster than our local water supply can keep up with, which is another major concern in our area. Building a dual-purpose flood mitigation / water retention structure upstream of Comfort would benefit our community in multiple ways. I urge you to investigate every possible means to implement such a structure.

Thank you again for your attention to these important steps toward a safer future.

Sincerely,

Amy Sinclair

Guadalupe Regional Flood Plan Survey

Inventory

The Regional Flood Plan will develop an inventory of natural features and major flood infrastructure within the region. The following section will help us identify and evaluate key features in your community.

9. Does your entity maintain GIS datasets or other digital inventories for any of the following natural features in your jurisdiction? Select all that apply.

If so, please provide this information by utilizing the [Upload Data](#) engagement tool at VPM Station 9 to provide any supporting data and documentation.

- Rivers, creeks, tributaries, and functioning floodplains
- Wetlands
- Sinkholes
- Alluvial fans
- Vegetated dunes
- No digital inventory of natural features
- This has already been provided to GLO
- Other (please specify)

10. Does your entity maintain GIS datasets or other digital inventories of the following constructed features in your jurisdiction? Select all that apply.

If so, please provide this information by utilizing the Upload Data engagement tool at VPM Station 9 to provide any supporting data and documentation.

- Levees
- Sea barriers, walls and revetments
- Tidal barriers and gates
- Stormwater tunnels
- Stormwater canals
- Flood protection dams
- Detention/retention ponds
- Weirs
- Storm drain systems
- No digital inventory of constructed features
- This has already been provided to GLO
- Other (please specify)

11. If available, provide a link to the location of the data on your entity's website.

12. What percentage of the following infrastructure or natural features within your jurisdiction would you consider non-functional?

Non-functional: The infrastructure is not providing its intended or design level of service.

	N/A	0%	25%	75%	100%
Stormwater tunnels	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

Guadalupe Regional Flood Plan Survey

Flood Prone Areas

The Regional Flood Plan will identify flood hazards and vulnerability in the region. The following section will help us identify who and what might be harmed by flooding in your community.

16. Provide a list of historical flood events that have affected your jurisdiction. Please provide as much information as possible, such as the date(s), specific location(s) (if appropriate), newspaper articles, the financial value damages (if known).

Identify areas on the [Interactive Comment Map](#), and/or upload historical information through the [Upload Data](#) page.

Guadalupe Regional Flood Plan Survey

Floodplain Management

The Regional Flood Plan will consider how current floodplain management practices and regulations impact flood risks. The following section will help us evaluate these practices and identify specific flood mitigation and management goals appropriate for this region.

17. Does your community participate in the following programs?

Select all that apply.

- National Flood Insurance Program (NFIP)
- Community Rating System (CRS)
- Do not participate but interested in National Flood Insurance Program (NFIP)
- Do not participate but interested in Community Rating System (CRS)
- I don't know
- Do not participate in either program and not currently interested (Please Describe)

Describe here

18. Does your community participate in the following floodplain management activities?

Select all that apply.

- Development review/regulation
- Floodplain or drainage capital projects
- Local assistance with home elevation
- Acquisition of repetitive loss properties
- Flood risk communication campaigns and public outreach
- Flood warning systems (Examples: flashers or staff gages)
- Emergency alert systems
- Priority evacuation areas
- Identification of vulnerable populations
- Programmed operations & maintenance
- Reactive maintenance following complaints or damages after a storm
- Programmed inspection/repair/rehab
- Asset inventory and comprehensive condition assessments
- Ordinance enforcement
- None of the above
- Other (please specify)

19. Development standards

- Floodplain ordinance
- Drainage ordinance
- Stormwater management ordinances
- Building standards for flood proofing and flood protection
- Consideration for fully developed or future conditions land use
- Zoning/land use regulations
- None of the above
- Other (please specify)

20. Infrastructure engineering design standards or Drainage Criteria Manual

- Roadway
- Crossings (bridges and culverts)
- Storm drainage systems
- Detention facilities
- Dams
- Levees/Floodwalls
- None of the above
- Other (please specify)

21. Higher standards

- Freeboard
- Detention policy
- Fill restrictions
- Other (please specify)

- None of the above

22. What future conditions scenarios are required to be evaluated for flood protection projects in your jurisdiction?

Please provide this information by utilizing the [Upload Data](#) engagement tool at VPM Station 9 to provide any supporting data and documentation.

- Existing development
- Projected development over a future time horizon
- Fully developed areas
- 0.2% ACE or 500-year Floodplain as proxy
- We do not use future conditions considerations for flood projection projects
- Other (please specify)

23. Identify the resources your jurisdiction uses to predict future land use and development.

Please provide this information by utilizing the Upload Data engagement tool at VPM Station 9 to provide any supporting data and documentation.

- TX Demographic Center Population Projections
- Future Land Use Plan from Comprehensive Plan
- Annexation Plans
- Utility CCNs
- Public Improvement Districts
- Texas Enterprise Zones
- Transportation Plans
- None of the above
- Other (please specify)

24. Which of the following best describes how your community enforces its Floodplain Management practices?

Select one.

- We actively enforce the entire floodplain management ordinance, perform many inspections throughout construction process, issue fines, violations, and Section 1316s where appropriate, and enforce substantial damage and substantial improvement.
- We enforce much of the ordinance, perform limited inspections and are limited in issuance of fines and violations.
- We provide permitting of development in the floodplain, may not perform inspections, may not issue fines or violations.
- We do not currently enforce floodplain management regulations.

Additional comments on enforcement:

The Regional Flood Plan Group (RFPG) will consider recommending or adopting consistent minimum standards across the entire region. "Recommended" standards would not require the communities to adopt the minimum standards to have projects included in the Regional Flood Plan and to be eligible for funding. "Adopted" standards would require the communities to adopt the minimum standards to have projects included in the Regional Flood Plan and to be eligible for funding. Recommended and Adopted standards can consider the unique needs of urban vs. rural, geographic needs, or other subregions defined by the RFPG.

25. Should the Regional Flood Planning Group (RFPG) "recommend" consistent minimum flood risk management standards across the entire Region?

These standards would be considered regional best practices, but would not be required to be adopted by local communities to participate in the Plan and be eligible for funding.

- Yes
- No

Please describe

26. What are some minimum flood risk management standards the Regional Flood Planning Group (RFPG) should consider *recommending*?

Select all that apply.

- Participation in the NFIP or equivalent standards
- Regulate development in the FEMA floodplain or other floodplain designation identified by the RFPG
- Establish higher standards for development or freeboard (additional feet above) known floodplain (Examples: Future Conditions BFE (base flood elevation), feet above existing BFE, 0.2% ACE (500-year floodplain) BFE, feet above street or curb)
- Establish infrastructure protection standards, minimum design criteria for buildings, critical facilities (hospitals, schools, fire stations, etc.), roadways, drainage infrastructure (culverts, bridges, storm drain, detention facilities, dams, or levees), property acquisition, and open space
- The RFPG should not recommend minimum flood risk management standards
- Other (please specify)

27. Should the Regional Flood Planning Group (RFPG) "adopt" consistent minimum flood risk management standards across the entire Region?

These standards would be required to be adopted by local communities to participate in the Plan and be eligible for funding.

- Yes
- No

Please describe

28. What are some minimum flood risk management standards the Regional Flood Planning Group (RFPG) should consider *adopting*?

- Participation in the NFIP or equivalent standards
- Regulate development in the FEMA floodplain or other floodplain designation identified by the RFPG
- Establish higher standards for development or freeboard (additional feet above) known floodplain (Examples: Future Conditions BFE (base flood elevation), feet above existing BFE, 0.2% ACE (500-year floodplain) BFE, feet above street or curb
- Establish infrastructure protection standards, minimum design criteria for buildings, critical facilities (hospitals, schools, fire station, etc.), roadways, drainage infrastructure (culverts, bridges, storm rain, detention facilities, dams, or levees), property acquisition, and open space
- The RFPG should not adopt minimum flood risk management standards.
- Other (please specify)

29. Please provide any additional thoughts on minimum flood risk management standards for the Regional Flood Planning Group (RFPG) to consider.

30. What are the top 3 priorities the Regional Flood Planning Group (RFPG) should include in the establishment of regional goals?

Select up to 3

- Implement protective standards and policies
- Identify and communicate flood risk
- Quantify potential reduction in risk to life and property
- Restore failing/aging infrastructure
- Implement flood warning and response mechanisms
- Provide or enhance inter-jurisdictional cooperation
- Other (please specify)

31. Are there any certain areas within the region that have especially unique circumstances that warrant their own sub-regional goals?

For example, the RFPGs may wish to consider the unique needs of coastal vs. inland, urban vs. rural areas, areas with detailed vs. approximate floodplain mapping and modeling, or upstream vs. downstream areas.

Yes

No

Please describe

32. Do you have any suggestions in the categories of Legislative, Regulatory/Administrative, or Revenue Generation that could help the region in the areas of floodplain management, flood mitigation planning, and mitigation, and/or reducing flooding impacts to life and property?

Legislative

Regulatory/
Administrative

Revenue Generation

Guadalupe Regional Flood Plan Survey

Flood Planning

The Regional Flood Plan will identify potential study needs and potentially feasible flood management strategies and projects. The following section will help us incorporate the needs of your community.

33. What types of local and regional flood planning information does your jurisdiction have?

Check all that apply and utilize the [Upload Data](#) engagement tool at VPM Station 9 to provide any supporting data and documentation.

- Hazard Mitigation Plan
- Master Drainage Plans/Stormwater Drainage Plans
- Flood Protection Plans
- Flood Studies/Flood Risk Assessments
- Watershed Plans
- CRS Plans
- Floodplain Management Plan
- Flood risk screening tools
- Models, including hydrology, hydraulics or any available screening level models
- None of the above

34. What additional relevant planning documents or information does your jurisdiction have?

Check all that apply and utilize the [Upload Data](#) engagement tool at VPM Station 9 to provide any supporting data and documentation.

- Flood disaster reports
- Coastal resiliency master plans
- Transportation plans
- Substantial Damage Estimation (SDE) forms
- Emergency Action Plans (flood-related portions)
- Other information relevant to the RFPG
- None of the above

35. Are there priority areas in your community with no inundation maps or detailed studies that could benefit from a flood study? If yes, please describe the reason for the need.

Please use the [Interactive Comment Map](#) to identify specific areas.

- No or limited inundation maps
- Outdated maps in need of updates study
- Need maps to identify flooding for urban areas, low lying areas, and/or streets
- No areas in need of study

36. Is there funding in your community for the necessary flood studies?

- No funding identified
- Partial local funding available
- Full funding identified
- Full funding secured
- Other (please specify)

37. Have grants or loans been secured for all or a portion of this funding?

- Yes
- No

If yes, please describe

38. Identify the resources your jurisdiction uses to identify how physical changes to the land might affect future flood risk.

Please provide this information by utilizing the [Upload Data](#) engagement tool at VPM Station 9 to provide any supporting data and documentation.

- | | |
|--|--|
| <input type="checkbox"/> Subsidence studies | <input type="checkbox"/> Studies on geomorphic changes |
| <input type="checkbox"/> Sea level rise studies | <input type="checkbox"/> Watershed studies with future conditions analysis |
| <input type="checkbox"/> Analysis of sedimentation of flood control structures | <input type="checkbox"/> None of the above |
| <input type="checkbox"/> Other (please specify) | |

39. What has your jurisdiction done to address flooding concerns?

- | | |
|---|---|
| <input type="checkbox"/> Nothing yet | <input type="checkbox"/> Upgraded existing drainage infrastructure |
| <input type="checkbox"/> Performed existing drainage system maintenance | <input type="checkbox"/> Constructed new drainage systems |
| <input type="checkbox"/> Performed project identification and planning activities | <input type="checkbox"/> Wetland/floodplain/open space restoration/preservation |
| <input type="checkbox"/> Performed more detailed analyses of areas to identify the source of the flooding | <input type="checkbox"/> Implemented and enforced drainage design criteria/floodplain management policies |
| <input type="checkbox"/> Other (please specify) | |

40. What, if any, major infrastructure or flood mitigation projects are currently under development?

Select all of the projects that apply. If so, provide this information by utilizing the Upload Data engagement tool at VPM Station 9 to provide any supporting data and documentation.

- | | |
|---|--|
| <input type="checkbox"/> Levees | <input type="checkbox"/> Stormwater canals |
| <input type="checkbox"/> Sea barriers, walls and revetments | <input type="checkbox"/> Flood protection dams |
| <input type="checkbox"/> Tidal barriers and gates | <input type="checkbox"/> Weirs |
| <input type="checkbox"/> Stormwater tunnels | <input type="checkbox"/> Storm drain systems |
| <input type="checkbox"/> Other (please specify) | |

41. What is the current status of the major infrastructure or flood mitigation projects currently under development?

Describe the project location(s) using the Interactive Comment Map. Please utilize the Upload Data engagement tool at VPM Station 9 to provide any supporting data and documentation.

- | | |
|--|--|
| <input type="checkbox"/> Project identified | <input type="checkbox"/> Project in Preliminary Design |
| <input type="checkbox"/> Project in conceptual planning phase | <input type="checkbox"/> Project in Final Design |
| <input type="checkbox"/> Project in feasibility analysis phase | <input type="checkbox"/> Project in Construction |
| <input type="checkbox"/> Other (please specify) | |

42. Is there funding in your community for the necessary engineering evaluations and/or design and construction of proposed flood mitigation projects?

Select one.

- No funding identified
- Partial funding available
- Full funding identified
- Full funding secured
- Other (please specify)

43. Have grants or loans been secured for all or a portion of this funding?

- Yes
- No
- N/A

44. Are there non-structural flood mitigation projects in your community with funding needs? If so, what level of funding is there in your community for these projects?

- | | |
|---|---|
| <input type="checkbox"/> No non-structural flood mitigation projects are needed in my community | <input type="checkbox"/> Projects are identified with partial funding available |
| <input type="checkbox"/> There is a need to identify non-structural flood mitigation projects in my community | <input type="checkbox"/> Projects are identified with full funding secured |
| <input type="checkbox"/> Projects are identified with no funding identified | |
| <input type="checkbox"/> Other (please specify) | |

Guadalupe Regional Flood Plan Survey

Funding

Flood studies (evaluations), management strategies, and projects identified in the Regional Flood Plan will be eligible for TWDB funding through grants and loans. The following section will help us understand the current funding mechanisms in your community and identify the proposed role of State financing.

45. Which of the following describes your local funding sources for flood management activities?

Select all that apply.

- | | |
|---|--|
| <input type="checkbox"/> General Fund | <input type="checkbox"/> Permitting Fees |
| <input type="checkbox"/> Bond Program | <input type="checkbox"/> Ad Valorem Tax |
| <input type="checkbox"/> Stormwater utility or Drainage fee | <input type="checkbox"/> I don't know |
| <input type="checkbox"/> Special Tax Districts | <input type="checkbox"/> No current dedicated funding but interested |
| <input type="checkbox"/> Impact Fees | <input type="checkbox"/> We do not have a local funding source for flood management activities |
| <input type="checkbox"/> Other (please specify) | |

46. Have you ever applied for Federal or State grants or loan programs?

If yes, please select which ones below.

- Flood Infrastructure Fund (FIF) [TWDB]
- Building Resilient Infrastructure and Communities Program (BRIC) [FEMA]
- Hazard Mitigation Grant Program (HMGP) [FEMA, TDEM]
- Pre-Disaster Mitigation (PDM) [FEMA, TDEM]
- U.S. Department of Agriculture - Natural Resources Conservation Service (NRCS)
- Community Development Block Grant-Disaster Recovery (CDBG-DR) [HUD, GLO]
- U.S. Army Corps of Engineers Small Continuing Authorities Program (USACE CAP)
- Cooperating Technical Partners Program (CTP) [TWDB]
- State Water Implementation Fund for Texas (SWIFT) [TWDB]
- Flood Protection Planning Grant [TWDB]
- Texas Water Development Fund (DFund) [TWDB]
- Clear Water State Revolving Fund (CWSRF) [TWDB]
- I don't know
- Other (please specify)

47. If you have not considered applying for Federal or State grant/loan programs, please state main reasons below.

Guadalupe Regional Flood Plan Survey

Flood Response

The Regional Flood Plan will document the existing flood response preparations in the region. The following section will help us understand the practices your community uses for emergency response.

48. Select the flood response measures your jurisdiction uses for emergency response:

Select all that apply.

- | | |
|---|---|
| <input type="checkbox"/> Public Emergency Alert System (i.e. reverse 911) | <input type="checkbox"/> Flood forecasting tool |
| <input type="checkbox"/> Flood warning signs | <input type="checkbox"/> Crew(s) set up barricades or close gates |
| <input type="checkbox"/> Flood warning signs with flashing lights | <input type="checkbox"/> Automatic low water crossing gates |
| <input type="checkbox"/> Flood gauges | <input type="checkbox"/> Outdoor siren/message speaker system |
| <input type="checkbox"/> Rain/stream gauges with alerts | <input type="checkbox"/> Swift water rescue team |
| <input type="checkbox"/> Public-facing website | <input type="checkbox"/> Cameras |
| <input type="checkbox"/> Portable/temporary traffic message boards | <input type="checkbox"/> None of the above |
| <input type="checkbox"/> Other (please specify) | |

49. If your jurisdiction plans to implement changes or additions to the emergency response system over the next five years, select the measures that you anticipate implementing:

Select all that apply.

- Public Emergency Alert System (i.e. reverse 911)
- Flood forecasting tool
- Flood warning signs
- Crew(s) set up barricades or close gates
- Flood warning signs with flashing lights
- Automatic low water crossing gates
- Flood gauges
- Outdoor siren/message speaker system
- Rain/stream gauges with alerts
- Swift water rescue team
- Public-facing website
- Cameras
- Portable/temporary traffic message boards
- None of the above
- Other (please specify)

50. Does your community have staff dedicated to flood response activities during emergency situations?

- No
- Yes (Please describe)

51. Are the staff embedded within the emergency operations center (or similar centralized location) during the event?

- No
- Yes (Please describe)

52. Indicate the entities with whom you coordinate actions related to flood events (preparation, response, recovery, and cleanup).

Select all that apply.

	Before	During	After	N/A

53. Any suggestions/recommendations to improve flood response?

Appendix 10-C | Public Comments

C.1 – Public Comments at Pre-Planning Meeting (August 4, 2021)

C.2 – Public Comments at Regular RFPG Meetings

C.3 – Compilation of Comment Tracking Matrices provided at Regular RFPG Meetings

Appendix C.1

Public Comments During Pre-Planning Public Meeting (August 4, 2021) and Virtual Public Meeting Room/ Interactive Comment Map (Aug 4 – 18, 2021)

Commenter Name	Commenter Affiliation	Nature of Comment	Method of Comment
Dianne Wassenich	Individual	Would like consideration of recreation activities in the floodplain. Would like to see the buying of land in the riparian area. To promote land conservation. Would like to see the Flood Plain elevation changed from 1ft to 2ft. The City of San Marcos took this approach	In - person
Gary Louie	Kendal	Emphasized loss of life and property; Provided letters from community; Would like consideration of funding for an early warning system; Would like to ensure that any projects keep the downstream in mind	In - person
Bob Mayo	Individual	Mentioned several projects for drinking water supply; Asked if Desalination studies have been done; Would like to keep farmland in consideration when flood planning	In - person
Linda Bishop	Individual	Would like to see the repair of the Lake Gonzales dam; Emphasized the importance of the Lake	In - person
Sara Dishman	City of Wimberley	Would like for construction activities along the river to be better enforced; Would like the enforcing of rules to be more consistent from the City of Wimberley; Believes there is a gap in	In - person

		communication between the City of Wimberley and the citizens	
Commissioner Jonathan Letz	Kerr County	Mentioned the struggles with Kerr County being in multiple watersheds; Would like to see Mayors and County Judges participating since these entities will need to apply for funding; Would like to take into consideration conservation efforts, partner with NRCS and keep water quality in mind; Would like to consider the RV Parks along the river; Kerr County would be submitting 3 projects and 2 joint projects from Kendall/Kerr County would be submitted to the RFPG.	In - person
Kari Potter	Individual	Would like to keep in mind the effect of high-density Developments and the additional impervious cover	In - person
Dennis Engelke	Caldwell County	Mentioned that Caldwell County has had multiple natural disasters from flood, fire and COVID-19; Would like for County, City and Local entities to stay involved and would like to ensure that this is a collaborative effort; Spoke of the growth in Caldwell County	In - person
Mark Gleason	San Marcos City Council	Mentioned that he was flooded twice in 2015; Mentioned that the Blanco River doesn't have any flood control and would like to know if there have been any studies done; Thanked the committee for their service	In - person

Jim Guin	TDEM	Introduced himself and informed the group that he is the individual that will be applying for hazard mitigation grants	In - person
Raymond Slade	Hydrogeologist	He shared information from published reports about flood peaks on the river at Spring Branch. He expressed concerns about the historic flood data not accurately representing the current flood plain.	VPM online
Tatjana Walker	Public Citizen	He shared opinions on recommended priorities for flood control which included increase in open space and park lands, development regulations in the flood plain, regulatory authority for counties, and protection of karst features.	VPM online
Holly Veselka	Public Citizen	She shared opinions on recommended nature based mitigation strategies. She also recommended priorities for flood control which included increase in open space and park lands, development regulations in the flood plain, regulatory authority for counties, and protection of karst features.	VPM online
Steven Fonville	Public Citizen	He shared concerns regarding the level of development currently allowed in floodway designated areas on the banks of the San Marcos River in Guadalupe Co.	VPM online
Shannon Curtice	Public Citizen	She shared recommendations on nature based solutions and watershed protection strategies.	VPM online

Eric Telford	Public Citizen	He expressed concerns over the floodplain designation on his property.	VPM online
Laurie Moyer	City of San Marcos	Identified multiple flood drainage channels and impacted roadways areas.	Interactive Comment Map
Thomas Manes	Public Citizen	Identified a flood drainage channel on the map.	Interactive Comment Map
Neil Rose	City of New Braunfels	Provided GIS data	Interactive Comment Map

Appendix C.2

Table C.2 Public Comments Made During Regular Guadalupe RFPG Meetings

Commenter Name	Commenter Affiliation	Nature of Comment	Date of Regular Meeting
<i>TBD</i>	<i>TBD</i>	<i>TBD</i>	<i>TBD</i>
Ben Eldredge	Cibolo Center for Conservation	Would like the RFPG to consider the importance of natural infrastructure, such as riparian areas	March 30, 2022
Ben Eldredge	Cibolo Center for Conservation and Cow Creek GCD	Mentioned the importance of natural infrastructure, especially within the recharge zone.	February 9, 2022
Ben Eldredge	Cibolo Center for Conservation	Spoke about the San Antonio RFPG and Dr. Dorman's work with the City of Boerne on stormwater ordinances. The San Antonio RFPG has suggested recommendations/ordinances based on the work done for the City of Boerne. The recommendations were created to improve stormwater quality for cities. Region 11 "would be interested in Dr. Dorman presenting at the February meeting".	December 1, 2022
Alan Montemayor	Chairman of the Alamo Group of the Sierra Club	Spoke of green infrastructure/nature base solutions being made a priority. Mr. Montemayor provided a letter.	November 3, 2021

<p>Virginia Conde</p>	<p>Executive Director of the San Marcos River Foundation</p>	<p>Two comments. Comment 1: Since the majority of the San Marcos River is not within the city limits, floodplain management falls to the county, which has had issues with grazing practices. It would be nice for counties to have more jurisdiction with regards to management. Comment 2: There are many break away structures within the floodplain, which has led to objects such as picnic tables ending up in the river during flood events.</p>	<p>November 3, 2021</p>
<p>Michael Pieprzica</p>	<p>N/A</p>	<p>Comment 1: Questions about flood planning process, rules, and recommendations. Comment 2: Has experience in the San Antonio area/Bexar County flood control district. Mentioned that frequently flooded soils area important variables, and talked about the money San Antonio has spent removing homes from the floodplain. Asked about any assistance that can help reviewers of subdivisions. Hopes that Region 11 can learn from San Antonio. Comment 3: mentioned the importance of natural methods for treating/controlling flood waters. Comment 4: Mentioned development upstream of a quarry and resulting flooding. Wants Region 11 to consider regional effects. Comment 5: Spoke about detention ponds and soil types for future developments.</p>	<p>September 8, 2021</p>

N/A	N/A	<i>No public comments were provided at the Regular RFPG Meetings occurring November 4, 2021 – June 30, 2021.</i>	November 4, 2021 – June 30, 2021

Comments Received Via comments@guadaluperfpg.org

July 14, 2021 – August 4, 2021

Date	Name/Affiliation	Comment/Question	Assigned to GBRA/FNI Team Member and Response
8/4/21	Raymond Slade	<p>Requested his comment that follows be shared with the RFPG at the 8/4/21 meeting:</p> <p>As a hydrologist my studies have included the Guadalupe River. I published a report about flood peaks on the river. The study documents that annual peaks have increased 38 % for the river at Spring Branch. Because of this the 100-year flood plain as published is too low. This is because the flood plain is based on historic data but does not represent increased floods. I was in contact with NOAA about Atlas 14 which represents the current floodplain. They agree with me about this problem but do not have the authority to include increased floods in the creation of the current Guadalupe River floodplains. Any questions about this can be sent to me.</p>	<p>Assigned to: B&A Response: Comment read before the RFPG on 8/4/21.</p>
8/4/21	James Blakey/ Councilmember District 6/ New Braunfels, TX	Are both meetings open to the public tonight?	Assigned to: FNI Response: Yes
7/30/21	Charlie Hastings/Kerr County	Can I join 8/4/21 meeting via zoom or other?	Assigned to: B&A

		aerial image of the Cascade Caverns Watershed.	to visit and gather additional information.
8/18/2021	Marjorie Lucey	Hi! I recently started getting your newsletter and I think it is great! It is a true service to those of us who care about the environment. I have a complaint about TXDOT. I never realized how bad for the environment they are. When they were trying to push through the changes to Wurzbach Pkway the plan involved the destruction of the mature trees along the parkway. I was appalled! At a time when the western US is experiencing horrendous fires it really hit home what they wanted to do! Not to mention I live right off of Wurzbach! We cannot let private and public entities destroy our mature trees! We have to stop the destruction of our planet and slowing TXDOT is a step in the right direction.	Assigned to: B&A Response: The Guadalupe Regional Flood Planning Group appreciates your interest in the regional flood planning process. Thank you for these comments and input.
8/16/2021	Elizabeth (Lisa) Arceneaux, P.E., CISEC, CPESC/City of San Marcos	Hi Lauren, You know me and how I'm a big proponent of using green infrastructure to protect our streams from receiving too much volume, and also stormwater with pollutant loading. So I would like to	Assigned to: B&A Response: From Alicia- The RFPG appreciates your interest in the regional flood planning process. Thank you for taking the time to provide us with these comments and input

		<p>include lots of options for green infrastructure in the plan to filter, infiltrate and detain storm water runoff. Here are some other suggestions that I think would help with inland flooding in cities like San Marcos:</p> <ol style="list-style-type: none"> 1. Purchase flood-prone lands for parks and open space- make the parks infiltration areas that also provide recreational space and connected by trails. 2. Place more stringent building rules and regulations within the flood way and floodplain- do not allow exceptions to the rules like many land development codes do. 3. Give more power to the counties to regulate things like break-away structures and activities in the floodplain and flood way 4. Allow lots to be stormwater management lots by building the structure on pier and beam or elevated and allowing the stormwater to flow under the house. Allows stormwater to spread out over a larger area of lot when it rains 	<p>Added email address to stakeholder list.</p>

		<p>5. Increase protection of karst recharge features in the Guadalupe River basin</p> <p>6. Add more green infrastructure and low impact development in urbanized areas through permeable pavement, cisterns, rain gardens, and green roofs. Incentivize these projects for funding with lower qualifying percentage of the total project (5% instead of 30%) and increasing the amount subsidized to 80-100% for up to \$500,000 or some other maximum deemed reasonable.</p> <p>7. Require 2D flood modeling with the NOAA Atlas 14 updated rainfall runoff predictions for the entire watershed basin</p> <p>8. Include future development and land cover change scenarios that come with population growth in the modeling.</p> <p>9. Fund 100% Green Infrastructure Master Plans and Green Infrastructure Implementation Plans for those cities that have a Watershed Protection Department</p> <p>10. Incentivize projects with higher subsidy that have triple bottom line benefits: environment, economic, equity.</p>

		<p>We have a great project that is being discussed but not committed to by city staff in San Marcos called the Green Alley Initiative that would convert 2.5 acres of underutilized downtown alleys into permeable paved alleys that are activated for public use and environmental benefit. The FIF would be a great option that the San Marcos City Council could consider to help get this off of the conceptual phase and into a preliminary engineering report. The options mentioned above could really benefit this kind of project and show the potential of activating alleys in this manner to store large volumes of stormwater (up to 475,000 gallons per rain event) while giving the downtown area a real boost in appearance and social function. This green infrastructure could alleviate the grey infrastructure by holding rainfall and reducing the height of the peak flow reaching the grey infrastructure piping. The end result is cleaner water to the river, and not having to upsize the grey infrastructure, plus economic benefit to downtown. I hope you all can consider</p>

		some of these options for the plan. Thanks!	
8/16/2021	Melissa Reynolds/ First Assistant City Engineer of New Braunfels	Jay, Our team uploaded low water crossings, MS4, historic flood closures, and drainage as both shapefiles and in a database format. The map upload was a bit confusing for municipal data so we also included some contact information. We have a great deal of data available for open download on our webpage which is how GLO retrieved most of it. We are open to meeting (Teams works well for us) if that would help facilitate any other data needed by the RFPG. Please let me know if we can be of further assistance.	Assigned to: FNI Response: From Jay Scanlon – Recognition that the data had been received, and that a teams meeting would be scheduled to discuss data and ways to improve the upload function in the interactive tool.
8/7/21	Shirley Solis/ Greater Comfort Area Chamber of Commerce	Please add my email address to your mailing list.	Assigned to: B&A Response: Added email address to stakeholder list.
8/7/21	Margaret Gomez/Travis County	Referred the RFPG to Shawn.snyder@traviscountytx.gov since she is up with all our records on flooding	Assigned to: B&A Response: Pending. Added Ms. Snyder to contact list.

9/16/2021	Commissioner Jonathan Letz Kerr County	<p>To: FNI Project Team Re: Data Submission</p> <p>Adam,</p> <p>I sent in the questionnaire.</p> <p>At the public meeting in Seguin, I mentioned again that Kerr County had five projects we would like to submit. One on these projects was presented to the board. I was under the impression that projects were to be submitted by 8/31/2021. We never heard what to submit or in what format.</p> <p>Kerr County will likely be the sponsor for any flood mitigation project in the county. Kerr County Commissioners Court does not have a seat on the flood planning board. Therefore, it is critical that that we be kept in the loop outside meetings.</p> <p>To date no consultant for the planning group has contacted anyone at our county level. This is becoming a concern.</p> <p>Thanks, Jonathan Letz</p>	Respondent: FNI Staff (Adam) Response Date: 9/17/21
9/16/2021	Raymond Buck Jr. General Manager Upper Guadalupe River Authority	<p>To: FNI Project Team Re: Data Submission</p> <p>Adam,</p> <p>I spoke with Commissioner Letz today about materials he was going to submit to the consultants. I understand he did not receive a reply to his email query on how to do so. I hope he can still submit and copied him on this email so you can reply directly.</p> <p>Thanks for taking care of this.</p>	Respondent: FNI Staff (Adam) Response Date: 9/17/21

9/12/2021	James 'JP' Fancher, DDS, PhD General Public	<p>To: Region 11 Regional Flood Planning Group Re: Meeting 8 September 2021</p> <p>Thank you for the opportunity to observe this regularly scheduled meeting. I hope to be able to observe and participate in all meetings in the future. My wife and I live on the banks of the San Marcos River in Guadalupe County across the stream from Martindale. We both have a great interest in issues concerning local and regional water management, flood plain and land management. I reviewed the online presentations in August. I added comments and also completed the online survey. I appreciate the time and effort that this working group is committed to completing in the next many months. It appeared to me that this group is still in the early stages of forming and developing a consensus to carry out the mandates and create deliverables. I was particularly glad to hear that the general purpose of this working group is to develop ideas and plans for action, not just recommendations for concrete projects. It is also my understanding that this group has no approval authority for projects but is a regional voice to gather information for further coordination. I have many ideas to share with you as this group progresses. The first is to consider that water management is much more than planning for floods. It also involves conserving a key resource that is in high demand 24/7 throughout this region and the entire state. I urge you to keep in mind that aquifer protection must work hand-in-hand with flood management. Retaining water for daily use as a key community resource is part of the solution to flood management. Please consider such innovations as swell and berm construction throughout the savannah, woodlands, and developed areas that make up the majority of this region's landscape; an innovation that will slow the runoff of water and charge the aquifer systems. I look forward to the next meeting when it is scheduled.</p>	<p>Respondent: Blanton & Associate Staff (Vanessa) Response Date: 9/14/21</p>
9/9/2021	Ken Gill County of Victoria	<p>Provided documents relating to Victoria County's Storm Drainage Master Plan (including pdf maps) and Drainage Criteria Manual. link to the Spring Creek Study for Victoria County</p>	<p>Respondent: Blanton & Associate Staff (Vanessa) Response Date: 9/14/21</p>

		<p>piece of the hill country is a goal of real estate development in this region, as fast as possible before regulations can shift the burden of responsible planning. Rainfall that lands in and around Blanco and Johnson City flows into the river basins and drops ~1000 ft of elevation as it rushes through the exploding communities along the I-35 corridor. Most of the actions planned are aimed at protecting these communities, not preventing the spread of flood risk.</p> <p>We have a double entendre of water management: #1 not enough potable water due to over pumping of our aquifers and periodic drought and #2 Poor to non-existent flood planning, especially in the rural areas and overdeveloped basins. Somehow these problems can be married to some common solutions; slowing and retaining rainwater to mitigate flooding and increase availability of potable water at the same time. This will be a lot less expensive than massive ditch and concrete projects and buyouts. Unfortunately, I see none of these concepts in the planning document.</p> <p>I attended several meetings last fall, and I will attempt to attend meetings in the future to monitor progress in this planning group. So far I simply have seen very little substantial progress in public. I hope there is more to come!</p> <p><i>JP Fancher, DDS, PhD 210-896-8575 345 Buie Lane Guadalupe County, TX 78655 paradox out</i></p>

		<p>It was great talking to you last week about your understanding of the list being compiled for the Guadalupe Regional Flood Planning Group. I mentioned an initiative here in San Marcos that is vetting through a pilot scale test that is in process to build in 2023. The concept is to activate San Marcos Alleys using permeable pavers as a baseline to improve storage of rain events that cause localized flooding (24-hour 2-5 year return frequency). Sarah Simpson, Aspen Navarro and myself were the primary contributors to the voluntarily prepared initiative (they are cc'ed here).</p> <p>Kissing Alley (https://downtownsmtx.squarespace.com/kissing-alley) in San Marcos is the pilot scale project and the larger vision is called The San Marcos Green Alley Initiative (https://www.color-space.com/the-san-marcos-green-alley-initiative). If fully implemented the alley network with permeable pavers could capture, slow down, clean and slowly release up to 500,000 gallons of rainfall and runoff each rain event. By using stormwater mitigation funding, the downtown area could realize economic vitality, and improvements to pedestrian mobility all while managing/mitigating localized flooding. A win-win project that would be a good example for the TWDB to support and others communities to consider.</p> <p>It may be too soon to add this initiative, but if you need projects, it could be perfect timing. The city of course will want to chime in to say if they want it include now or not. I'm including Laurie Moyer, P.E. on this e-mail to comment, and for my part, I'm just providing the link (above). I would love to meet up with you when you get the Doucet office set up on Corporate Drive and we can walk through Kissing Alley and see the vision of the initiative together. Plus answer questions.</p> <p>Thank you!</p> <p><i>Lisa Arceneaux, P.E., CISEC, CPESC</i> <i>512-644-1927 (cell)</i></p>

1.0 INTRODUCTION

The Freese and Nichols, Inc. Team (FNI Team) was retained by the Guadalupe-Blanco River Authority (GBRA), on behalf of the Region 11 Guadalupe Regional Flood Planning Group (RFPG), to develop the 2023 Guadalupe Regional Flood Plan (the Project) through a transparent process where public input and participation is welcomed and encouraged. GBRA is the project sponsor. As part of this process, the Texas Water Code (TWC) Section 16.062 and Title 31 Texas Administrative Code (TAC) Chapter 361 require public notice and input opportunities. GBRA is responsible for ensuring all public notice and participation activities are carried out as required by the TWC and 31 TAC. The FNI Team prepared this Public Involvement Plan (PIP) for the RFPG to supplement those legally required efforts with opportunities to encourage and obtain meaningful public and stakeholder input throughout the planning process. As a member of the FNI Team, Blanton & Associates, Inc. (B&A) will provide support in implementation of this PIP.

1.1 Background

In 2019, the Texas Legislature created and funded the first-ever regional and state flood planning process in response to historic flooding and the need for flood planning. The regional flood plans are to be delivered to the Texas Water Development Board (TWDB) by January 10, 2023, and then every five years thereafter. The state flood plan will be adopted by September 1, 2024, and then every five years thereafter. The planning process is intended to be a “bottom up” approach with the regional flood plans informed by the local communities. The planning process is also intended to be a transparent process with opportunities for public input. The objectives of the regional flood plans (RFPs) are to: 1) document existing flood infrastructure and preparedness; 2) identify current and future flood risk and hazard; 3) develop flood mitigation/management goals; 4) identify and evaluate flood management strategies and mitigation projects; and 5) evaluate benefits/impacts to the water supply, environment, and economics. Through this process administered by the TWDB, the state designated 15 flood planning area regions, including the Region 11 Guadalupe Flood Planning Region (see **Figure 1**). The planning area boundaries for each region are based upon watersheds (e.g., river basins) rather than political boundaries. The Project study area extends from the Hill Country in Real and Kerr counties in the northern part of the river basin, southeastward to the Texas Coast in Calhoun County (See **Figure 2**).

The flood planning process for Region 11 is administered by GBRA and led by a committee of volunteer members, or the RFPG. The RFPG is composed of 15 members, with one member representing each of the following interests: general public, agriculture, small business, industries, environmental, electric generating utility, water utility, flood districts, and water districts; and two members representing each of the following interests: municipalities, counties, and river authorities. The members represent the interests of organizations throughout the Guadalupe River Basin. The RFPG meetings are held monthly.

1.2 Public Involvement Summary

Public involvement and participation are critical to the success of the regional flood planning process. The *Regional Flood Planning Public Notification Quick Reference (Attachment A)* was prepared by the TWDB and identifies all of the TWC and 31 TAC requirements for public notice and public comment.

Figure 1. Fifteen Flood Planning Regions in Texas

As mentioned previously, all legal notice requirements are being met by the GBRA¹. In addition, the RFPG has expressed a desire to encourage public input and comment in a manner that exceeds the requirements in the TWC and 31 TAC. Towards this end, the FNI Team will implement the following strategies:

- Develop an extensive public and stakeholder contact list;
- Develop and implement an interactive map tool to place on the RFPG website to gather information about flood prone areas and existing flood management efforts through the use of forms and surveys;
- Identify and evaluate opportunities to enhance available information on the RFPG website;
- Use social media accounts to post messages about upcoming RFPG meetings and activities;
- Develop and implement a virtual public meeting tool to supplement the in-person RFPG meetings, as applicable; and
- Review and report on all public comments received through either the RFPG website.

Each of these strategies are discussed in detail below in **Section 3.0**.

2.0 PUBLIC AND STAKEHOLDER INVOLVEMENT STRATEGIES

The public and stakeholder involvement will emphasize two-way communication between the public and stakeholders and the RFPG. The RFPG will strive to maintain proactive communication and information dissemination during the planning process so the public and stakeholders are informed and know where to find information or who to speak with should they have any information, comments, questions, or concerns.

Through this PIP, the public and stakeholders will be informed and provided opportunities to express their views, opinions, and concerns, and to share data and information relevant to the flood planning process. This PIP provides an outline of proposed public and stakeholder involvement throughout the planning process. A general list of RFPG, GBRA and FNI Team roles and responsibilities is included as **Attachment B**. A public and stakeholder involvement schedule for each meeting or hearing, as discussed below, will be refined throughout the process. This PIP will be implemented through the strategies and activities described below, which are intended to provide a broad range of opportunities to reinforce public and stakeholder engagement and participation. Adhering to COVID-19 safety protocols for these meetings will be encouraged.

2.1 Public and Stakeholder Contact List

So as not to duplicate efforts with the Texas General Land Office (GLO) regional flood study that includes the Guadalupe River Basin, the FNI Team will prepare a public and stakeholder contact list by starting with

¹ This PIP does not address efforts to comply with the legal requirements for notices in the TWC and the TAC, nor the FNI Team's efforts to draft Chapter 10 of the RFP related to documenting and responding to all comments received during the 60-day public comment period required by TWC §16.062(f) - (g) and 31 TAC §361.21(h)(3).

the list compiled by the GLO. Consistent contacts (e.g., county judges, mayors, etc.) with those included in the GLO study area counties will be added to the list for those counties outside of the GLO study area (e.g., Bandera, Blanco, Gillespie, Hays, Kendall, Kerr, Real, and Wilson counties). The team will also review the list for contact categories that may need to be added (e.g., legislators).

To date, the list includes approximately 400 contacts and reflects the following public and stakeholder contact categories:

- Legislators – Governor, Lieutenant Governor, Speaker of the House of Representatives, Senators, and Representatives.
- County Judges and County Commissioners
- Mayors, City Councilmembers, and City Administrators/Managers
- County Floodplain Administrators
- Emergency Management staff
- County Engineers
- County Public Works Directors
- City Public Works Directors
- Fire Chiefs
- River Authorities
- Groundwater Conservation Districts
- Regional Water Planning Group members
- Environmental Organizations

This list will continue to be updated as the Project proceeds and more of the public and stakeholders become aware of the RFPG’s efforts and request to be added to the list. This extensive list will be used to carry out the public outreach activities noted below for RFPG meetings.

2.2 Interactive Mapping Tool and Surveys

The FNI Team will create an interactive tool consisting of a map of the Guadalupe River basin. The map will be accompanied by either 1) a form for the public to complete to add their comments and information regarding flood prone areas and flood strategies or projects in their communities; or 2) a survey for agency representatives to complete providing more detailed information about flood risks and projects in their communities. The interactive tool will be linked on the RFPG website and will be “live” for the duration of the Project. Information uploaded to the interactive tool beyond a date to be determined by the FNI Team will not be considered for the 2023 Regional Flood Plan and will be stored for use in the next regional flood planning cycle.

2.3 GBRA Website Information

In addition to the interactive tool to be linked to the Region 11 Guadalupe Regional Flood Plan website, the FNI Team will also look for opportunities to supplement information on the website with information or announcements that will help to inform the public and stakeholders. These include posting a summary announcement of upcoming RFPG meetings and the Project schedule to provide the public and stakeholders information on project progress and opportunities for participation.

2.4 Social Media

The FNI Team will work with GBRA staff to create posts for project social media accounts that are established by GBRA. The FNI Team will submit drafts of the posts to GBRA staff at least ten days before each meeting so that GBRA staff can review and approve the drafts and then post them at least seven days before the event.

2.5 Virtual Public Meeting Format

One of the strategies for this PIP is to support certain in-person RFPG public meetings by enabling participation across the entire Project area through a Virtual Public Meeting (VPM) format. The FNI Team, at the direction of the RFPG, will present the RFPG in-person meeting content (Project information) in a “virtual meeting room” with information stations located throughout the room. At the start of the meeting, meeting attendees (e.g., elected officials, agency representatives, members of the public, etc.) will enter the meeting on-line at the “sign-in” station, where they will be asked to sign in to record their attendance. They will be greeted by a narrator who will guide them through the virtual meeting room and provide information regarding the meeting content (e.g., presentations, display boards, videos, etc.) presented at each station. The meeting attendees will move through the meeting content at their own pace, including re-visiting stations as needed. The final station will provide an opportunity for meeting attendees to post questions or comments. The meeting content can be made available in Spanish or other languages, if requested. This meeting option will go “live” as close to the in-person meeting time as possible and will remain active for two weeks after the date of the in-person meeting.

2.6 Public Comment Tracking, Response, and Reporting

The FNI Team will develop a system for receiving and reviewing all public and stakeholder comments received through either the RFPG website or during a RFPG meeting, responding to each comment, and providing monthly reports to the RFPG of comments and responses. A system for providing a written update to the RFPG and a complete summary of all comments received will be developed.

3.0 GUADALUPE REGIONAL FLOOD PLANNING GROUP MEETINGS

3.1 Monthly Meetings

Awareness of RFPG monthly meetings, which will typically be held on the first Wednesday of every month at GBRA’s offices, is critical to encouraging and obtaining public and stakeholder input and support, and

the meetings provide an understandable and convenient means to comment and ask questions. The public and stakeholders will be notified of the opportunity to visit the RFPG's website (<http://guadaluperfpg.org/Meetings.aspx>) for specific dates, times and locations of all meetings.

To supplement the seven-day meeting notices required by the TWC and 31 TAC and to promote awareness, the FNI Team may perform the following tasks:

Seven days in advance of the meeting:

- Send an email meeting announcement to those on the public and stakeholder distribution list;
- Send an email to the councils of governments that cover some portion of Region 11 to request they post the announcement on their websites;
- Send an email to the San Antonio River Authority, as the South Central Texas Regional Water Planning Group (Region L) Administrator, to request that they post the announcement of the upcoming meeting on the Region L website, and send a copy of the announcement to their Region L members;
- Send an email to the Lower Colorado River Authority, as the Region 10 Lower Colorado River Basin RFPG (Region 10) Sponsor and the San Antonio River Authority as the Region 12 San Antonio River Basin RFPG (Region 12) Sponsor to request that they post the announcement of the upcoming meeting on their websites, and send a copy of the announcement to their RFPG members;
- Send meeting announcement text to GBRA for both the Region 11 RFPG and the GBRA websites; and
- Draft social media post text for GBRA to post on their social media accounts and distribute the message to the RFPG members for them to post on their accounts.

The FNI Team may prepare draft email announcements listed above for each monthly meeting. The team will submit each announcement to GBRA staff for review prior to their notice deadline. The announcements will include information about the meeting, a link to the Region 11 website, and an email address for submitting comments or questions, as applicable. After GBRA staff has approved each announcement, the team will work with GBRA staff to distribute the email announcements. Requests to receive announcements by USPS mail, if any, will be handled accordingly.

3.2 Supplemental Support for Pre-Planning Public Meetings and Other Required Meetings

Texas Water Code §16.062(d), and 31 TAC §§361.12(a)(4) and 361.21(h)(2)(A) require the RFPG to hold two or more pre-planning public meetings to obtain input from the public regarding suggestions and recommendations as to issues, provisions, projects, and strategies to be considered for inclusion during the flood planning cycle and the regional flood plan.

In addition to the pre-planning public meetings, the TWDB's *Technical Guidelines for Regional Flood Planning*, the TWC and/or 31 TAC require the RFPG to obtain public input on: 1) identified flood risk in the region and developed a map summarizing the risk; 2) flood mitigation and floodplain management goals

as they relate to existing flood risk per the TWC; 3) a process for identifying potential flood management evaluations (FMEs) and potentially feasible flood management strategies (FMSs) and flood management projects (FMPs); 4) the final RFP; 5) amendments to the RFP; and 6) changes to the RFPG membership.

To supplement the 14-day meeting notices required by the TWC and 31 TAC, to promote awareness of these public meetings, and to help encourage public and stakeholder participation and input, the FNI Team may perform the following tasks:

21 days in advance of the meeting:

- Send an email meeting announcement to those on the public and stakeholder distribution list;

Seven days in advance of the meeting

- Send a reminder email meeting announcement to those on the public and stakeholder distribution list;
- Send an email to the councils of governments that cover some portion of Region 11 to request they post the announcement on their websites;
- Send an email to the San Antonio River Authority, as the South Central Texas Regional Water Planning Group (Region L) Administrator, to request that they post the announcement of the upcoming meeting on the Region L website, and send a copy of the announcement to their Region L members;
- Send an email to the Lower Colorado River Authority, as the Region 10 Lower Colorado River Basin RFPG (Region 10) Sponsor and the San Antonio River Authority as the Region 12 San Antonio River Basin RFPG (Region 12) Sponsor to request that they post the announcement of the upcoming meeting on their websites, and send a copy of the announcement to their RFPG members;
- Send meeting announcement text to GBRA for both the Region 11 RFPG and the GBRA websites; and
- Draft social media post text for GBRA to post on their social media accounts and distribute the message to the RFPG members for them to post on their accounts.

Three days in advance of the meeting

- Send text to GBRA staff to incorporate into media advisories announcing upcoming meeting.

The FNI Team may prepare draft email announcements listed above for each pre-planning public meeting. The team will submit each announcement to GBRA staff for review prior to their notice deadline. The announcements will include information about the meeting, a link to the RFPG website, and an email address for submitting comments or questions, as applicable. After GBRA staff has approved each announcement, the team will work with GBRA staff to distribute the email announcements. Requests to receive announcements by USPS mail, if any, will be handled accordingly.

A general checklist of action items to be completed and RFPG, GBRA and FNI Team roles and responsibilities are included as **Attachment B**. The meeting facilities will be selected and reserved by GBRA staff, in close coordination with the RFPG. GBRA will attempt to identify facilities that provide adequate capacity, ample parking, and ample room/space to disseminate information, and ideally, the meeting facilities will be located within the Project study area. The team will endeavor to secure meeting facilities that are free of charge.

These meetings will be conducted so that attending stakeholders and the public can listen to the information being presented and view the presentation by the FNI Team. The team may distribute informational materials, such as Project-related handouts, and may present Project exhibits/display boards, etc. Informed and easily identifiable FNI Team members will register attendees, address questions and comments, and guide attendees through the public meeting process at the in-person meetings. These meetings will be convened in-person to take place after business hours and may be supplemented by a VPM format.² The RFPG will determine when the meetings will go “live.” During the two-week VPM comment period, the public and stakeholders will be able to view the same information that was reviewed during the in-person meeting and will be able to leave comments or add their contact information in the virtual meeting room for the Project. After the two-week comment period, the virtual public meeting room information will remain accessible through the RFPG website so people can view the information; however, adding comments or contact information will not be possible after the end of the comment period. The virtual public meeting room information will be available for educational purposes only after the two-week comment period closes (see discussion above in **Section 2.5**).

The virtual public meeting room information will encourage the public and stakeholders to use the interactive map tool (discussed above in **Section 2.2**) to enter comments and sign up to receive information through a link to the RFPG website.

3.3 Draft Regional Flood Plan Public Meeting

Texas Water Code §16.062(f) - (g) and 31 TAC §361.21(h)(3) require the RFPG to hold one or more public meetings to obtain input from the public on the draft RFP. To supplement the 30-day meeting notice and the 60-day public comment period required by the TWC and 31 TAC, to promote awareness of the public meeting(s), and to help encourage public and stakeholder participation and input, the FNI Team may perform the following tasks:

Seven days in advance of the 30-day meeting notice and the beginning of the 60-day public comment period:

- Send an email announcement to those on the public and stakeholder distribution list;

²This VPM supplement will need to be reviewed with TWDB staff to determine if a virtual meeting option is possible and what meeting notice requirements will apply.

Seven days in advance of the meeting:

- Send a reminder email meeting announcement to those on the public and stakeholder distribution list;
- Send an email to the councils of governments that cover some portion of Region 11 to request that they post the announcement on their websites;
- Send an email to the San Antonio River Authority, as the South Central Texas Regional Water Planning Group (Region L) Administrator, to request that they post the announcement of the upcoming meeting on the Region L website, and send a copy of the announcement to their Region L members;
- Send an email to the Lower Colorado River Authority, as the Region 10 Lower Colorado River Basin RFPG (Region 10) Sponsor and the San Antonio River Authority as the Region 12 San Antonio River Basin RFPG (Region 12) Sponsor to request that they post the announcement of the upcoming meeting on their websites, and send a copy of the announcement to their RFPG members;
- Send meeting announcement text to GBRA for both the Region 11 RFPG and the GBRA websites; and
- Draft social media post text for GBRA to post on their social media accounts and distribute the message to the RFPG members for them to post on their accounts.

Three days in advance of the meeting:

- Send text to GBRA staff to incorporate into media advisories announcing upcoming meeting.

The FNI Team may prepare draft email announcements listed above for the public meeting. The team will submit each announcement to GBRA staff for review prior to their notice deadline. The announcements will include information about the meeting, a link to the draft RFP on the RFPG website, and an email address for submitting comments or questions, as applicable. After GBRA staff has approved each announcement, the team will work with GBRA staff to distribute the email announcements. Requests to receive announcements by USPS mail, if any, will be handled accordingly.

This plan presumes that at least one in-person meeting will be held for this purpose after hours. A general checklist of action items to be completed and RFPG, GBRA and FNI Team roles and responsibilities are included as **Attachment B**. The meeting facility will be selected and reserved by GBRA staff, in close coordination with the RFPG.

The public meeting will be conducted so that attending stakeholders and the public can listen to the information being presented and view the presentation by the FNI Team. The team may distribute informational materials, such as Project-related handouts, and may present Project exhibits/display boards, etc. Informed and easily identifiable FNI Team members will register attendees, address questions and comments, and guide attendees through the public meeting process at the in-person meeting.

The in-person meeting may also be supplemented by a virtual public meeting.³ The virtual public meeting will be made available to access so the “meeting room” content is accessible for the entire 60-day public comment period. During the comment period, the public and stakeholders will be able to view the same information that was reviewed during the in-person meeting and will be able to leave comments or add their contact information in the virtual meeting room.

4.0 CONCLUSION

Flood planning for the Guadalupe River Basin is a transparent, public process where public and stakeholder participation is welcome and encouraged. It is the intent of the RFPG that the public and stakeholders understand that their insight is valuable and with it, the RFPG will be better able to address the flood needs of all communities in the Guadalupe River Basin, and to help identify potential funding for these much-needed projects.

The outreach activities included in this PIP for the Project will allow the public and stakeholders to be informed about the Project and will encourage their interaction with the RFPG, GBRA, and the FNI Team. Overall, implementation of this PIP is intended to increase awareness of the regional flood planning process and allow any interested parties to play a role in the development of the 2023 Guadalupe Regional Flood Plan.

³This virtual public meeting supplement will need to be reviewed with TWDB staff to determine if a virtual meeting option is possible and what meeting notice requirements will apply.

***IMPORTANT NOTES**
 All meetings of subsets of the RFPG that constitute a quorum of the RFPG must be noticed appropriately.
 The best reference material for RFPG members to ensure that they are in compliance with notice requirements is the Texas Attorney General Office "Open Meetings Handbook 2020" available at: https://www.texasattorneygeneral.gov/sites/default/files/files/divisions/open-government/openmeetings_hb.pdf
 The Attorney General's Open Records Division maintains an Open Government Hotline to answer questions regarding open government laws. The Hotline can be reached at (877) 673-6839 (OPENTEX).
 To the extent an action by the RFPG could qualify under more than one row of this matrix (for instance, a regular meeting), the stricter notice requirements should be used.
 RFPGs may provide notice for various actions in a single notice. However, a document providing notice for multiple actions should describe all actions individually.
 RFPGs shall also provide additional region-specific public notice, if any, in accordance with their decision under §361.11(d)(6), including provision of print notices, if applicable.
 **RFPGs must provide a means by which it will accept written public comment prior to and after all meetings. Specific timelines prescribed by rule are noted in this section.
